

SureSense

THE SURE WAY TO DETECT ANY OBJECT

Cylindrical Photoelectric Sensors

SICK
Sensor Intelligence.

Solving a wide range of sensing applications has never been easier thanks to the SureSense family of photoelectric sensors. From simple to challenging tasks, this ultra reliable sensor family can detect nearly any object in any environment, ensuring your machines and lines stay up and running at full capacity.

the same housing style, this sensor family also allows you to standardize on a single sensor platform to reduce mounting, assembly and procurement costs.

Easily accommodate connection variability

Whether you standardize on connectors, cables or pigtails, SureSense has you covered. SureSense allows you to specify cables and connectors that are optimized for your application.

Wide sensing breadth

SureSense is equipped with a wide range of sensing types all available in the same housing design. This allows you to reduce variability in bracketry and mounting design.

Flexible functionality

SureSense allows you to define the configuration features you prefer. SICK can provide you with pre-set sensors with no external configurability or sensors with sensitivity adjustments, light/dark switching, time delays or a combination of each.

A FAMILY BUILT TO FIT PERFECTLY IN YOUR ENVIRONMENT

Optimize setup and performance

Traditional sensors provide little or no information regarding the quality of setup or performance. The SureSense signal strength light bar provides instant feedback on the quality of alignment, adjustment and light signal being returned from an object. This additional information allows you to quickly optimize setup to minimize the effects of vibration, object variability and more.

Retroreflective and through-beam

Quick and easy setup with instant feedback regarding the alignment of reflective and through-beam sensors.

Background suppression

Optimize the switching point adjustment to maximize sensing reliability.

Energetic

Continuous signal strength feedback based on object reflectivity provides indication of fluctuations during operation.

Maximum durability with VISTAL housing

VISTAL, meaning like steel, is a fiberglass-reinforced material that provides strength and chemical resistivity that is far superior to traditional plastic housings. This gives you “like steel” durability without the cost of metal housings.

Suppression of background reflections

SureSense is equipped with a secondary “pilot LED” to detect interfering objects and reflections in the background. Built-in intelligence automatically suppresses the interfering objects and reflections to maximize detection reliability.

Enhanced cross talk immunity

Unique technology inside SureSense pulses light at a specific time interval and frequency to minimize false tripping due to cross talk from other sensors.

A FAMILY BUILT TO DETECT ANY OBJECT

Precise detection of small objects

The SureSense family is equipped with cutting-edge laser technology, permitting very precise detection of small objects, small holes or through small openings.

Minimal impact from object variability

SICK's industry leading background suppression technology is virtually unaffected by changes in color and materials. Combined with PinPoint LED technology, this provides highly precise and repeatable object detection.

Maximum detection reliability

PinPoint technology from SICK, with its highly visible light spot, will facilitate commissioning, and increase the sensing range, without the need for protective measures against lasers.

Reliably detect dark and shiny materials

In these applications, built in intelligence will automatically adjust the light beam to maximize the light being returned to the sensor. This greatly improves reliability when sensing dark and shiny objects.

Consistent transparent object detection

AutoAdapt technology by SICK, increases the up-time of your machine by automatically adjusting the switching threshold as dust or dirt collects on the sensor during operation. SureSense then automatically resets the threshold after cleaning.

SIRIC ASIC technology

Sensors equipped with SIRIC technology are more powerful than ever before and are highly resistant to all known optical and high-frequency influences. This drives optical reliability regardless of ambient light and emitted light from other sensors. It also helps to maximize reliable sensing distance while miniaturizing sensor size.

SELECTION GUIDE

THE SURE WAY TO DETECT ANY OBJECT

Product description

Designed to streamline your sensor selection, the SureSense photoelectric proximity sensors with background suppression are available with an extensive range of connections, configurations (light /dark switch and time delays)

and power supplies all within the same hybrid housing style. Additionally, SureSense is available with a signal strength light bar, which provides immediate feedback to improve sensing reliability during adjustment.

At a glance

- Intuitive signal strength light bar
- Best-in-class background suppression
- VISTAL “tough as steel” housing
- Long sensing range of 300 mm
- Multiple connection and configuration options with identical housing design
- PinPoint LED for highly visible and precise light spot
- DC or AC/DC power supply

Your benefits

- Light bar optimizes adjustment and sensing reliability
- Reliably detect multiple colors and objects with minimal black /white shift
- Automatically suppress detection of unwanted objects or reflections
- Durability of VISTAL housing reduces replacement costs and downtime
- Reduce costs by standardizing sensor mounting, accessories and setup procedures
- Precise detection with no need for protective measures against lasers

Detailed technical data

Features

	DC	AC/DC
Sensor principle	Photoelectric proximity sensor	
Detection principle	Background suppression	
Dimensions (W x H x D)	16.2 mm x 45.5 mm x 31.8 mm (Cable) 16.2 mm x 44.9 mm x 31.8 mm (M8) 16.2 mm x 48.5 mm x 31.8 mm (M12) (depending on type)	16.2 mm x 45.5 mm x 34.4 mm
Housing design (light emission)	Hybrid	
Thread diameter (housing)	M18	
Sensing range max.	5 mm ... 300 mm ¹⁾	
Sensing range	5 mm ... 150 mm ²⁾	
Type of light	Visible red light	
Light source ³⁾	PinPoint 2.0 LED	
Light spot size (distance)	Ø 7 mm (300 mm)	
Wave length	631 nm	
Adjustment	Potentiometer (depending on type)	
Time delay ⁴⁾	On delay / Off delay (depending on type)	
Special features	Light/dark switching selection switch Signal strength light bar (depending on type)	

¹⁾ Object with 90 % reflectance (referred to standard white, DIN 5033)

²⁾ Object with 6 % reflectance (referred to standard black, DIN 5033)

³⁾ Average service life: 100,000 h at T_U = +25 °C

⁴⁾ Adjustable: 0 ... 2 s

Mechanics/electronics

	DC	AC/DC
Supply voltage	10 V DC ... 30 V DC ^{1) 2)}	21.6 V DC ... 250 V DC ^{2) 3)} 96 V AC ... 250 V AC
Ripple ⁴⁾	< 5 V _{pp}	–
Power consumption	≤ 20 mA ⁵⁾	≤ 10 mA ⁶⁾
Output type	NPN PNP PNP and NPN (depending on type)	MOSFET
Switching mode	Light switching Dark switching Light/dark switching (complementary) (depending on type)	Light switching Dark switching (depending on type)
Output current I_{max.}	≤ 100 mA	
Response time ⁷⁾	≤ 0.5 ms	
Switching frequency ⁸⁾	1,000 Hz	
Connection type	Cable, 4-wire ⁹⁾ Male M8, 4-pin Male M12, 4-pin Cable with male M8, 3-pin Cable with male M8, 4-pin Cable with male M12, 4-pin (depending on type)	Cable, 3-wire ⁹⁾ Cable with male Micro 1/2-20, 4-pin
Circuit protection	A ¹⁰⁾ , B ¹¹⁾ , D ¹²⁾	
Protection class	III ¹³⁾	II ¹⁴⁾

	DC	AC/DC
Weight	18 g	
Housing material	VISTAL	
Optics material	PMMA	
Enclosure rating	IP 67, IP 69K	
Ambient operating temperature	-40 °C ... +65 °C	
Ambient storage temperature	-40 °C ... +75 °C	

¹⁾ Above T_a 55 °C, max. voltage = 24 V and max. current = 50 mA.

²⁾ Limit values when operated in short-circuit protected network: max. 8 A.

³⁾ Above T_a 60 °C, max. voltage = 120 V.

⁴⁾ May not exceed or fall below U_v tolerances.

⁵⁾ Without signal strength light bar and load.

⁶⁾ Without load. The output load and sensor must use the same power source.

⁷⁾ Signal transit time with resistive load.

⁸⁾ With light/dark ratio 1:1.

⁹⁾ Do not bend below 0 °C.

¹⁰⁾ A = V_s connections reverse-polarity protected.

¹¹⁾ B = inputs and output reverse-polarity protected.

¹²⁾ D = outputs overcurrent and short-circuit protected.

¹³⁾ Reference voltage: 50 V DC.

¹⁴⁾ Rated voltage 250 V AC, overvoltage category 2.

Ordering information

Products with the technical data listed above are available even if that specific part number is not defined in this document.

See type code ordering matrix and availability rules on → [page 10](#) for all possible combination of sensors that are available. Contact your local SICK sales representative or look on → www.mysick.com/en/HTB18 to request information on a part number not shown in this document.

THE SURE WAY TO DETECT ANY OBJECT

Product description

Designed to streamline your sensor selection, the SureSense energetic proximity sensors suppression are available with an extensive range of optic technologies, connections, configurations (light /dark switch and time delays) and power

supplies all within the same hybrid housing style. Additionally, SureSense sensors are available with a signal strength light bar, which provides continuous feedback of object reflectivity.

At a glance

- Intuitive signal strength light bar
- VISTAL “tough as steel” housing
- Long sensing ranges: 600 mm for red light and 1 m for infrared light
- Multiple optic, connection and configuration options with identical housing design
- PinPoint LED for highly visible and precise light spot
- DC or AC/DC power supply

Your benefits

- Light bar allows instant signal strength feedback during operation and setup
- Durability of VISTAL housing reduces replacement costs and downtime
- Reduce costs by standardizing sensor mounting, accessories and setup procedures
- PinPoint LED allows small object detection without the need for protective measures against lasers

THE SURE WAY TO DETECT ANY OBJECT

Product description

Designed to streamline your sensor selection, the SureSense photoelectric proximity sensors with foreground suppression are available with an extensive range of connections, configurations (light /dark switch and time delays)

and power supplies all within the same hybrid housing style. Additionally, SureSense is available with a signal strength light bar, which provides immediate feedback to improve sensing reliability during adjustment.

At a glance

- Intuitive signal strength light bar
- VISTAL “tough as steel” housing
- Long sensing range of 300 mm
- Multiple connection and configuration options with identical housing
- PinPoint LED for highly visible and precise light spot
- DC or AC/DC power supply

Your benefits

- Light bar allows fast and simple alignment during installation
- Durability of VISTAL housing reduces replacement costs and downtime
- Reduce costs by standardizing sensor mounting, accessories and setup procedures
- Precise detection with no need for protective measures against lasers

THE SURE WAY TO DETECT ANY OBJECT

Product description

Designed to streamline your sensor selection, the SureSense photoelectric proximity sensors with foreground suppression are available with Type I laser optical technology and an extensive range of connections and configurations

(light /dark switch and time delays) all within an identical hybrid housing style. Additionally, SureSense is available with a signal strength light bar, which provides immediate feedback to improve sensing reliability during adjustment.

At a glance

- Intuitive signal strength light bar
- VISTAL “tough as steel” housing
- Precise laser light spot
- Long sensing range of 125 mm
- Multiple connection and configuration options with identical housing

Your benefits

- Light bar allows fast and simple alignment during installation
- Durability of VISTAL housing reduces replacement costs and downtime
- Precise detection of small objects features
- Reduce sensor costs by standardizing mounting, accessories and setup procedures

THE SURE WAY TO DETECT ANY OBJECT

Product description

The SureSense family of photoelectric sensors provides reliable detection of virtually any object in any environment. This versatility allows detection of the very basic to most difficult objects including black, shiny, transparent, varying color and more. SureSense does this by providing best-in-class performance along with

an extremely broad offering of sensing options, output types and advanced features. Plus, an intuitive signal strength light bar makes installation and troubleshooting easier than ever. All this cutting edge technology is built into a VISTAL™ housing, which is 9 times stronger than ABS housings.

At a glance

- Intuitive signal strength light bar
- Options for standard adjustment or AutoAdapt adjustments
- VISTAL “tough as steel” housing
- Multiple connection and configuration options with identical housing
- DC or AC/DC power supply

Your benefits

- Light bar allows fast and simple adjustment and alignment during installation
- Precise detection of a wide variety of transparent objects
- AutoAdapt technology automatically adjusts threshold as dust or dirt collects on sensor and resets once cleaned
- Durability of VISTAL housing reduces replacement costs and downtime
- Reduce sensor costs by standardizing mounting, accessories and setup procedures

Product description

Designed to streamline your sensor selection, the SureSense retro-reflective sensors with laser optic technology are available with an extensive range of connections and configurations (light / dark switch and time delays) all within

the same hybrid housing style. All of these options are available with a signal strength light bar, which provides immediate feedback to improve alignment and setup speed.

At a glance

- Intuitive signal strength light bar
- VISTAL “tough as steel” housing
- Precise laser light spot
- Long sensing range of 12 m
- Multiple connection and configuration options with identical housing design

Your benefits

- Light bar ensures fast and simple visual-based alignment
- Durability of VISTAL housing reduces replacement costs and downtime
- Precise detection of small objects, features and holes
- Reduce costs by standardizing sensor mounting, accessories and setup procedures

THE SURE WAY TO DETECT ANY OBJECT

Product description

Designed to streamline your sensor selection, the SureSense through beam sensors are available with an extensive range of optics, connections, configurations (light /dark switch and time delays)

and power supplies all within the same hybrid housing style. All these options are available with a signal strength light bar, which provides immediate feedback to improve alignment and setup speed.

At a glance

- Intuitive signal strength light bar
- Long sensing ranges: 25 m for red light and 20 m for infrared light
- Multiple optic, connection and configuration options within identical housing
- VISTAL “tough as steel” housing
- PinPoint LED for highly visible and precise light spot
- DC or AC/DC power supply

Your benefits

- Light bar optimizes alignment during installation
- Reduce sensor costs by standardizing mounting, accessories and setup procedures
- Durability of VISTAL housing reduces replacement costs and downtime
- Precise detection with no need for protective measures against lasers

Product description

Designed to streamline your sensor selection, the SureSense through-beam sensors with laser optic technology are available with an extensive range of connections and configurations (light /dark switch and time delays) all within the

same hybrid housing style. All these options are available with a signal strength light bar, which provides immediate feedback to improve alignment and setup speed.

At a glance

- Intuitive signal strength light bar
- Precise laser light spot
- Long sensing range of 60 m
- Multiple connection and configuration options with identical housing
- VISTAL “tough as steel” housing

Your benefits

- Light bar optimizes alignment during installation
- Precise detection of small objects, features and holes
- Reduce sensor costs by standardizing mounting, accessories and setup procedures
- Durability of VISTAL housing reduces replacement costs and downtime

Detailed technical data

Features

Sensor principle	Through-beam photoelectric sensor
Dimensions (W x H x D)	16.2 mm x 45.5 mm x 31.8 mm (Cable) 16.2 mm x 44.9 mm x 31.8 mm (M8) 16.2 mm x 48.5 mm x 31.8 mm (M12) (depending on type)
Housing design (light emission)	Hybrid
Thread diameter (housing)	M18
Sensing range max.	0 m ... 60 m
Sensing range	0 m ... 50 m
Type of light	Visible red light
Light source ^{1) 2)}	Laser
Light spot size (distance)	Ø 2 mm (1.5 m)
Wave length	655 nm
Laser class	I
Adjustment	Potentiometer (depending on type)
Time delay ³⁾	On delay / Off delay (depending on type)
Special features	Light/dark switching selection switch Signal strength light bar (depending on type)

¹⁾ Average service life 50,000 h at T_A = +25 °C

²⁾ CLASS 1 LASER PRODUCT EN60825-1:2008-05; IEC60825-1:2007-03; Maximum pulse power < 2,5 mW, Pulse length: 4 µs, Wavelength: 650 ... 670 nm;
Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

³⁾ Adjustable: 0 ... 2 s

Mechanics/electronics

Supply voltage ^{1) 2)}	10 V DC ... 30 V DC
Ripple ³⁾	< 5 V _{pp}
Power consumption ⁴⁾	≤ 20 mA
Output type	PNP NPN PNP and NPN PUSH/PULL (depending on type)
Switching mode	Light switching Dark switching Light/dark switching (complementary) (depending on type)
Output current I_{max.}	≤ 100 mA
Response time ⁵⁾	≤ 0.5 ms
Switching frequency ⁶⁾	1,000 Hz
Connection type	Cable, 4-wire ⁷⁾ Male M8, 4-pin Male M12, 4-pin Cable with male M8, 3-pin Cable with male M8, 4-pin Cable with male M12, 4-pin (depending on type)
Circuit protection	A ⁸⁾ , B ⁹⁾ , D ¹⁰⁾
Protection class ¹¹⁾	III
Weight	18 g
Housing material	VISTAL

Optics material	PMMA
Enclosure rating	IP 67, IP 69K
Ambient operating temperature ¹²⁾	-30 °C ... +55 °C
Ambient storage temperature	-40 °C ... +75 °C

¹⁾ Above T_a 45 °C, max. voltage = 24V and max. current = 50 mA.

²⁾ Limit values when operated in short-circuit protected network: max. 8 A.

³⁾ May not exceed or fall below U_v tolerances.

⁴⁾ Without signal strength light bar and load.

⁵⁾ Signal transit time with resistive load.

⁶⁾ With light/dark ratio 1:1.

⁷⁾ Do not bend below 0 °C.

⁸⁾ A = V_s connections reverse-polarity protected.

⁹⁾ B = inputs and output reverse-polarity protected.

¹⁰⁾ D = outputs overcurrent and short-circuit protected.

¹¹⁾ Reference voltage: 50 V DC.

¹²⁾ Below T_a = -10 °C, sensor must be turned on at T_a > -10 °C. Sensor cannot be turned on below T_a = -10 °C.

Ordering information

Products with the technical data listed above are available even if that specific part number is not defined in this document.

See type code ordering matrix and availability rules on → [page 10](#) for all possible combination of sensors that are available. Contact your local SICK sales representative or look on → www.mysick.com/en/HSE18L to request information on a part number not shown in this document.

HSE18L, DC, Signal strength light bar

- **Type of light:** visible red light
- **Laser class:** I
- **Voltage type:** DC
- **Switching mode:** Light/dark switching (Q1 = light switching.) (Q2 = dark switching.)

Sensing range max.	Output type	Connection	Connection diagram	Type	Part no.
0 m ... 60 m	NPN	Cable, 4-wire, 2 m	Cd-331	HSE18L-N1G5BA	1074781
	PNP			HSE18L-P1G5BA	1074780
	NPN	M12, 4-pin	Cd-330	HSE18L-N4A5BA	1074778
	PNP			HSE18L-P4A5BA	1074776

SERVICES FOR MACHINES AND SYSTEMS: SICK LifeTime Services

Our comprehensive and versatile LifeTime Services are the perfect addition to the comprehensive range of products from SICK. The services range from product-independent consulting to traditional product services.

Consulting and design
Safe and professional

Product and system support
Reliable, fast and on-site

Verification and optimization
Safe and regularly inspected

Upgrade and retrofits
Easy, safe and economical

Training and education
Practical, focused and professional

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With almost 7,000 employees and over 50 subsidiaries and equity investments as well as numerous representative offices worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."

Worldwide presence:

Australia, Austria, Belgium, Brazil, Canada, Chile, China, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Hungary, India, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, New Zealand, Norway, Poland, Romania, Russia, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, USA, Vietnam.
