Socket attachment plug with surge protection for the power supply and signal connection of an end device with analog or digital telecommunications interface (VDSL up to 50 Mbps, on short paths (< 300 m) up to 80 Mbps). Cable is included.

Your advantages

- · Optimal additional protection of the building installation for longer service life and increased availability of the end devices
- · Industrial quality for residential buildings, thanks to compliance with international product standard
- · Meets the most stringent safety requirements with thermal monitoring and additional fuses
- · Special router protection, thanks to simultaneous protection of the power supply and the signals
