

# WEEE RoHS & PB (LEAD FREE) IDENTIFICATION LABELS

These labels are preprinted to meet the requirements specified by EN 50419 of the WEEE Directive 2002/96/EC. All electrical and electronic equipment must be compliant by August 13, 2005. Customers that sell electrical or electronic products into the EU and other locations outside of Australia will be required to meet this standard. The Wheelie Bin labels can help your company to meet this directive.

Wheelie Bin labels have an aggressive adhesive to ensure strong holding power and are printed on UL recognised and CSA accepted material.

### WHAT IS WEEE?

It is a European Union directive that requires the collection and treatment of electronic & electrical equipment (EEE) at the end-of-the products life. The WEEE marking is defined in EN 50419 and the crossed out wheeled bin with bar is one of the correct methods. Every producer must provide information on re-use and treatment for new EEE within one year of placing it onto the market, in order to inform re-use centres, treatment and recycling facilities.

### WHAT IS RoHS?

It is the European Union (EU) Directive on the Restriction of certain Hazardous Substances which bans the use of certain substances in electrical and electronic equipment products placed on the European market after July 2006.

These substances are: Cadmium (Cd), mercury (Hg), hexavalent chromium (Cr (VI)), polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) and lead (Pb).

### WHAT ARE THE BENEFITS OF THE RoHS DIRECTIVE?

The extraction of these raw materials and their eventual disposal, can cause damage to both the environment in terms of pollution, as well as to human health from occupational exposure and exposure following disposal. The removal of these materials from production will reduce the health risks of exposure, particularly for children, the elderly and pregnant women.

### WHO IS AFFECTED BY THESE DIRECTIVES?

As of August 2005, anyone that: Manufactures and sells electrical and electronic equipment within the specified categories under their own brand, sells equipment produced by other suppliers under their own brand, imports (or exports) affected equipment into European Union (EU) member states will be affected by both directives.

### WHERE CAN I FIND OUT MORE INFORMATION?

To find out more about this directive and how it may affect your business, Brady has a dedicated website which will provide you with all the information available on complying with this directive.
