

HDBaseT HDMI over Cat5e/6/6a Extender Transceiver, Serial and IR Passthrough, 1080p, Up to 500 ft. (150 m)

MODEL NUMBER: **BHDBT-TR-SI-ER**

Description

Insert the BHDBT-TR-SI-ER HDBaseT HDMI over Cat5e/6/6a Extender Transceiver between the transmitter and receiver units in your Tripp Lite HDBaseT installation to extend the range of your signal. Connect its HDMI port to a projector, monitor or television to expand your installation.

Using a single Cat5e/6/6a cable, the BHDBT-TR-SI-ER transmits uncompressed HDMI audio and video, RS-232 serial and IR control signals up to 500 feet (150 m) from the previous unit in the chain (either the transmitter or another transceiver), including 1920 x 1080 (1080p) signals @ 60 Hz. Add up to five BHDBT-TR-SI-ER Extender Transceivers to the chain for a total range up to 3,000 feet (900 m) with a monitor connected to each transceiver.

RS-232 serial signals and IR remote control signals (@ 39 KHz) also pass through the transceiver, so your HDBaseT installation can control such RS-232 devices as scanners and touchscreen displays at baud rates up to 115 Kbps. You can also operate a Blu-ray player using its remote when at the remote monitor and vice versa. Locking HDMI ports (ideal for use with Tripp Lite's P569-006-LOCK High-Speed HDMI cables with locking connectors) prevent cables from coming loose or undone, ensuring an intact signal. Attach the BHDBT-TR-SI-ER to a wall, rack or pole using the included hardware.
