Programmable Current Limit Switch

General Description

SY6875A is a programmable current limit switch with input voltage range selection and output voltage clamping. Extremely low $R_{DS(ON)}$ of the integrated protection N-channel FET helps to reduce power loss during the normal operation. Programmable soft-start time controls the slew rate of the output voltage during the start-up time. Independent enable control allows the complicated system sequencing control. It integrates the over-temperature protection shutdown and auto-recovery with hysteresis. This IC along with small DFN3X3-10 footprint provides small PCB area application.

Note 1: Stresses beyond “Absolute Maximum Ratings” may cause permanent damage to the device. These are for stress ratings. Functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions may affect device reliability.

Note 2: θ_{JA} is measured in the natural convection at $T_A = 25^\circ\text{C}$ on a low effective single layer thermal conductivity test board of JEDEC 51-3 thermal measurement standard. Test condition: Device mounted on 2" x 2" FR-4 substrate PCB, 2oz copper, with minimum recommended pad on top layer and thermal vias to bottom layer ground plane.

Note 3. The device is not guaranteed to function outside its operating conditions

Note4. Recommended Soft-start Time Program Table

SST cap (nF)	None	10	55	105
Rise time (ms)	1.4	2.8	15.4	29.4

Recommended Formula for C_{SST} & Soft-start Time Calculation

$$T_{SS} = \begin{cases} T_{SS_DLT}, & \text{No external } C_{SST} \\ \frac{C_{SST}}{I_{INT}}, & T_{SS} > T_{SS_DLT} \end{cases},$$

Where, T_{SS_DLT} is the internally fixed default soft-start time, about 1.4ms, which means there's no any external C_{SST} ; I_{INT} is the internal current source, about 3.6uA.

Note5. Recommended Current Limit Program Table

Recommended Formula for R_{LIM} & Current Limit Calculation

$$R_{LIM} = \frac{11k}{I_{LIM}} (\Omega).$$
