Product Description

Visually compelling Warning Labels attract attention, meet legal requirements, look after the safety of its product and people while keeping the cost down for your business. Warning Labels are a necessity to make sure your visitors and your employees are aware of any potential hazards. The Antistatic Labels are internationally recognizable since 1933. You can identify them quickly as they have a triangular shape with a black border on a yellow coloured background. The regulation states that the yellow colour (or amber) should take up to at least 50% of the sign area. The ESD (Electrostatic Discharge) Warning Label plays a crucial role in keeping your components safe against the static. We are proudly introducing our own branded RS PRO ESD Vinyl Warning Labels, which are self-adhesive for use on products or packaging. The roll contains 100 individual paper Labels written in English with a height of 50 and a width of 25 mm. These Safety Labels made of tough vinyl for durability. They conform to BS EN 61340-5-1 control program compliance, so you can be confident when purchasing these safety stickers.
