

Compact Cylinder/Standard: Double Acting Single Rod

Series CQ2

ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

How to Order

Standard CQ2 B 20 30 D

With auto switch CDQ2 B 20 30 D A73 S

Thread Port (ø32 to ø100)
 — Rc(PT)
 E G(PF)

With auto switch (Built-in magnet)

Mounting
 B Through-hole (Standard) F Front flange
 A Both ends tapped G Rear flange
 L Foot D Double clevis

*Mounting brackets are shipped not assembled with the cylinder.

Style
 — Pneumatic
 H Air-hydro (1)

Note 1) The bores for air-hydro are ø20 to ø100.

Bore size
 12 12mm 40 40mm
 16 16mm 50 50mm
 20 20mm 63 63mm
 25 25mm 80 80mm
 32 32mm 100 100mm

Piping
 — Screw-in piping
 F With One-touch fitting (2)

Note 2) The tubes for the built-in One-touch fittings are ø32 to ø63. They cannot be used for the air-hydro.

Auto switch
 — Without auto switch (Cylinder built-in magnet)
 * Refer to table below for auto switch model no.

Number of auto switches
 — 2
 S 1
 n n

Body option
 — Standard (Rod end female thread)
 F Rear boss mount
 C With rubber bumper (3)
 M Rod end male thread

* Combination of body option is possible. CM, FC, FM, FCM
 Note3) Air-hydro with rubber bumper is not available.

Action
 D Double acting

Cylinder stroke (mm)
 Refer to p.1-427 for standard and intermediate stroke.

Applicable Auto switches

Style	Special function	Electrical entry	Indicator	Wiring (Output)	Load voltage		Rail mounting		Direct mounting		Lead wire*(m)				Applicable load

*Lead wire length 0.5m..... (Example) A80C 5m..... Z (Example) A80CZ
 3m..... L (Example) A80CL None..... N (Example) A80CN
 *Solid state switches marked with a "○" are manufactured upon receipt of order.

Refer to p.1-430 for parts No. of auto switch mounting brackets.

Mounting Bracket Part No.

Bore size (mm)	Foot (4)	Flange	Double clevis (6)
12	CQ-L012	CQ-F012	CQ-D012
16	CQ-L016	CQ-F016	CQ-D016
20	CQ-L020	CQ-F020	CQ-D020
25	CQ-L025	CQ-F025	CQ-D025
32	CQ-L032	CQ-F032	CQ-D032
40	CQ-L040	CQ-F040	CQ-D040
50	CQ-L050	CQ-F050	CQ-D050
63	CQ-L063	CQ-F063	CQ-D063
80	CQ-L080	CQ-F080	CQ-D080
100	CQ-L100	CQ-F100	CQ-D100

Note 4) 2 pcs. per cylinder should be ordered when foot brackets are required.

Note 5) Each package contains the following parts.

Foot, Flange: Body mounting bolt

Double clevis: Clevis pin, C shape snap ring for axis, body mounting bolt

Note 6) Package for double clevis contains clevis pin and snap ring.

Compact Cylinder/Standard: Double Acting Single Rod *Series CQ2*

JIS symbol

Double acting: Single rod

Symbol

Rear boss mount

Allowable Kinetic Energy

Refer to p.1-428 for allowable kinetic energy.

Standard Stroke

Pneumatic

Bore size (mm)	Standard stroke (mm)
12, 16	5, 10, 15, 20, 25, 30
20, 25	5, 10, 15, 20, 25, 30, 35, 40, 45, 50
32, 40	5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 75, 100
50 to 100	5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 75, 100

• Refer to p.1-532 when stroke exceeds standard range.

Air-hydro

Bore size	Standard stroke (mm)
20, 25	5, 10, 15, 20, 25, 30, 35, 40, 45, 50
32, 40	5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 75, 100
50, 63, 80, 100	10, 15, 20, 25, 30, 35, 40, 45, 50, 75, 100

Style

Bore size (mm)		12	16	20	25	32	40	50	63	80	100
Pneumatic	Mounting	Through-hole (Standard)	●	●	●	●	●	●	●	●	●
		Both ends tapped	●	●	●	●	●	●	●	●	●

	Piping	Screw-in style	M5	M5	M5	M5	M5 ⁽¹⁾ 1/8	1/8	1/4	1/4	3/8
		With One-touch fitting	—	—	—	—	ø6/4 ⁽²⁾	ø6/4	ø8/6	ø8/6	—
	Rod end male thread		●	●	●	●	●	●	●	●	●
	With rubber bumper		●	●	●	●	●	●	●	●	●
	Rear boss mount		●	●	●	●	●	●	●	●	●
Air-hydro	Mounting	Through hole (Standard)	—	—	●	●	●	●	●	●	●
		Both ends tapped	—	—	●	●	●	●	●	●	●
	Built-in magnet		—	—	●	●	●	●	●	●	●
	Piping	Screw-in style	—	—	M5	M5	M5 ⁽¹⁾ 1/8	1/8	1/4	1/4	3/8
		Rod end male thread	—	—	●	●	●	●	●	●	●
	Rear boss mount		—	—	●	●	●	●	●	●	●

Note 1) Among those without an auto switch, only the 5mm stroke uses M5 piping.

Note 2) Among those with a built-in fitting, the 5mm stroke with the ø32 bore has the same outer dimensions as the 10mm stroke.

Specifications

Style	Pneumatic (Non-lube)	Air-hydro
Fluid	Air	Turbine oil ⁽¹⁾
Proof pressure	1.5MPa	
Max. operating pressure	1.0MPa	
Ambient and fluid temperature	Without auto switch: -10°C to 70°C (No freezing)	
	With auto switch: -10°C to 60°C (No freezing)	
Rubber bumper	None	—
Rod end thread	Female thread	
Tolerance of rod end thread	JIS class 2	
Tolerance of stroke length	+1.0 0	
Mounting	Through-hole	
Piston speed	50 to 500mm/s	5 to 50mm/s

Note 1) Refer to precautions.

Note 2) For applications involving lateral loads, refer to the "Lateral Load Resistant Style" on p.1-552

Minimum Operating Pressure

Unit: MPa

Bore size (mm)	12	16	20	25	32	40	50	63	80	100
Pneumatic (Non-lube)	0.07		0.05							
Air-hydro	—		0.18				0.10			

Intermediate Strokes

Style	Standard body	Exclusive body (-XB10)
Model No.	Refer to "How to Order" for standard model No. on p.1-426	Specify "-XB10" at the end of the standard model No. shown on p.1-426
Method	Intermediate strokes at 1mm increments are available by using a spacer with standard stroke cylinders.	Intermediate strokes at 1mm increments are available by using an exclusive body for required stroke.
Stroke range	Bore size	Bore size
	Stroke range	Stroke range
	12, 16	1 to 29
	20, 25	1 to 49
Example	Model No.: CQ2B50-57D A 18mm width spacer is installed in the standard CQ2B50-75D. B dimension is 115.5mm.	32, 40
		50 to 100
		6 to 29
		6 to 49
Example	Model No. CQ2B50-57D-XB10 Makes an exclusive body for 57mm stroke. B dimension is 97.5mm.	6 to 99
		11 to 99

- 1) Consult us when intermediate strokes with a spacer are required for ø40 to ø100 rubber bumper models.
- 2) Reference values for length dimensions are different in case of ø32 to ø100 exclusive body models (-XB10) with a stroke exceeding 50mm.
Calculate length dimensions by deducting from those of 75 or 100mm stroke models.
- 3) Refer to long stroke styles of CQ2 (P.1-542) for strokes exceeding the stroke range.

⚠ Precautions

⚠ Caution

Snap Ring Installation/Removal

- ① For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).

- ② Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Allowable Kinetic Energy

Table 1: Load weight and Piston speed

[J] 1J ≈ 0.102kgf/m

Bore size (mm)	12	16	20	25	32	40	50	63	80	100
Standard allowable kinetic energy: Ea	0.022	0.038	0.055	0.09	0.15	0.26	0.46	0.77	1.36	2.27
With rubber bumper allowable kinetic energy: Eb	0.043	0.075	0.110	0.18	0.29	0.52	0.91	1.54	2.71	4.54

$$\text{Kinetic energy } E(J) = \frac{(m_1 + m_2) V^2}{2}$$

m1: Weight of cylinder operating part kg
m2: Load weight kg
V: Piston speed m/s

* Seal kits consist of items ⑫, ⑬ and ⑭ contained in one kit, and can be ordered using the order number for each respective tube bore size.

Auto Switch Mounting Brackets Parts No.

Bore size (mm)	Mounting bracket part No.	Note	Applicable switch	
			Reed switch	Solid state switch
12/16 20/25	BQ-1	•Switch mounting screw (M3 X 8 ϕ) •Square nut	D-A7□, A80 D-A73C, A80C D-A7□H, A80H D-A79W	D-F7□, J79 D-F7□V D-J79C D-F7□W, J79W D-F7□WV D-F7BA D-F7□F D-F7NT
32/40 50/63 80/100	BQ-2	•Switch mounting screw (M3 X 10 ϕ) •Switch spacer •Switch mounting nut		

[Stainless steel mounting bolt set]

The set of stainless steel mounting screws (with nuts) described below is available and can be used depending on the operating environment. (The spacers for auto switches must be ordered separately, as they are not included.)

BBA2: For D-A7/A8/F7/J7 types

The stainless steel bolts described above are used when the D-F7BA type switch is shipped mounted on a cylinder. When the switches are shipped as individual parts, the BBA2 set is included.

Compact Cylinder/Standard: Double Acting Single Rod **Series CQ2**

Clean Series

10 — CQ2B **Bore size** **Stroke** **D (M)**

- Clean series
- 10—Relief style
- 11—Vacuum style

• $\phi 12, \phi 16, \phi 20, \phi 25, \phi 32, \phi 40, \phi 50, \phi 63$

The rod portion of the actuator has a double seal construction, and a relief port is provided to discharge the exhaust air directly outside of the clean room. Thus, it can be used in a Class 100 clean room.

Specifications

Action	Double acting single rod
Cylinder bore size	$\phi 12, \phi 16, \phi 20, \phi 25, \phi 32, \phi 40, \phi 50, \phi 63$
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	None ⁽¹⁾
Piping method	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole
Auto switch	Attachable

Note 1) $\phi 12$ with switch: With rubber bumper (Standard)

Copper Free

20 — CQ2B **Bore size** **Stroke** **D (C)(M)**

- Copper free series

• $\phi 12, \phi 16, \phi 20, \phi 25, \phi 32, \phi 40, \phi 50, \phi 63, \phi 80, \phi 100$

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Double acting single rod
Cylinder bore size	$\phi 12, \phi 16, \phi 20, \phi 25, \phi 32, \phi 40, \phi 50, \phi 63, \phi 80, \phi 100$
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	With, Without
Piping method	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole, Both ends tapped
Auto switch	Attachable

Construction

10-CQ2 Series (Double seal)

Relief port

Bushing
Rod seal

A relief port is provided in the area between the double rod seals to discharge the exhaust air outside of the clean room. Thus, the amount of dust generated has been reduced to 1/20 of that of an ordinary cylinder.

11-CQ2 Series (Single seal/Vacuum adsorption)

Vacuum port
(Vacuum adsorption)

Bushing
Rod seal

Structurally identical to the "10-" series, the outer rod seal has been removed to evacuate through the vacuum port. This draws out any external air from the clearance between the rod and the cover to practically eliminate the generation of external dust. This should be used in an application that requires an even higher level of cleanliness than the "10-" series.

Water Resistant

CDQ2 **Mounting** **Bore size** **R** **Stroke** **D** **Option** **F7BAL** **-XC6**

- With auto switch (Built-in magnet)
- Water resistant cylinder
- Made to Order
- Water resistant 2 colour indication solid state switch

R	Seal NBR (Nitril rubber)
V	Seal FKM (Fluoro rubber)

This is ideal for use in a machine tool environment exposed to coolant. It is also well suited for use in areas in which water splashes, such as food processing equipment or car washers.

Specifications

Action	Double acting Single rod
Bore size (mm)	$\phi 20, \phi 25, \phi 32, \phi 40, \phi 50, \phi 63, \phi 80, \phi 100$
Cushion	None
Auto switch mounting	Rail mounting (D-F7BAL)
Made to Order	Piston rod, Rod end nut: Stainless steel (-XC6)

* Specifications except mentioned above are same as standard basic.

Series CDQ2 Auto Switch Specifications

Refer to p.6-15 for details of auto switch.

Auto Switch Mounting

Mount the auto switch as figure below.

ø12 to ø25

ø32 to ø100

Compact Cylinder/Standard: Double Acting Double Rod

Series CQ2W

ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

How to Order

Standard CQ2W B 20 30 D

With auto switch CDQ2W B 20 30 D A73 S

Thread Port (ø32 to ø100)

—	Rc(PT)
E	G(PF)

With auto switch (Built-in magnet)

B	Through-hole (standard)	L	Foot
A	Both ends tapped	F	Flange

* Mounting brackets are shipped not assembled with the cylinder.

Mounting

Style

—	Pneumatic
H	Air-hydro (1)

Note 1) Air-hydro bore size: ø20 to ø100

Auto switch

—	Without auto switch (Built-in magnet)
---	---------------------------------------

* Refer to table below for auto switch model No.

Number of auto switches

—	2
S	1
n	n

Body option

—	Standard (Rod end female thread)
C	With rubber bumper (3)
M	Rod end male thread

* Combination of body option (CM) is possible.
Note 3) Rubber bumper for air-hydro is not available.

Action

D	Double acting
---	---------------

Stroke (mm)

Refer to Standard stroke table on p.1-447

32, 40 50, 63 80, 100	BQ-2	• Switch mounting screw (M3 X 10 ϕ) • Switch spacer • Switch mounting nut		

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting

- When removing a load, be sure to secure the wrench flats of the piston rod on the load side.
- If this is done without securing the piston rod on the load side, be aware that the coupled (screwed-in) portion of the piston rod could become loosened.

Compact Cylinder/Standard: Double Acting Double Rod **Series CQ2W**

Construction

With rubber bumper

With One-touch fitting

Rod end male thread

Component Parts

No.	Description	Material	Note
①	Cylinder tube	Aluminum alloy	Hard anodized
②	Piston	Aluminum alloy	Chromated
③	Piston rod A	Stainless steel	ø12 to ø25
		Carbon steel	ø32 to ø100, Hard chromated
④	Piston rod B	Stainless steel	ø12 to ø25
		Carbon steel	ø32 to ø100, Hard chrome plated
⑤	Collar	Aluminum bearing alloy	ø12 to ø40, Anodized
		Aluminum alloy casting	ø50 to ø100, Chromated, plated
⑥	Snap ring	Carbon tool steel	Phosphate coating
⑦	Bushing	Lead bronze casting	For ø50 or larger
⑧	Rod end nut	Carbon steel	Nickel plated
⑨	Bumper	Urethane	
⑩	One-touch fitting	—	ø32 to ø63
⑪*	Rod seal	NBR	
⑫*	Piston seal	NBR	
⑬*	Tube gasket	NBR	
⑭	Piston gasket	NBR	

Replacement Parts: Seal Kits (Pneumatic)

Bore size (mm)	Kit No.	Contains
12	CQ2WB12-PS	Kits include items ⑪, ⑫ and ⑬ from the table above.
16	CQ2WB16-PS

80	CQ2WB80-PS	
100	CQ2WB100-PS	

Replacements Parts: Seal Kits (Air-hydro)

Bore size (mm)	Kit No.	Contains
20	CQ2WBH20-PS	Kits include items ⑪, ⑫ and ⑬ from the table above.
25	CQ2WBH25-PS	
32	CQ2WBH32-PS	
40	CQ2WBH40-PS	
50	CQ2WBH50-PS	
63	CQ2WBH63-PS	
80	CQ2WBH80-PS	
100	CQ2WBH100-PS	

*Seal kits consist of items ⑪, ⑫ and ⑬ contained in one kit, and can be ordered using the kit number for each respective tube bore size.

Copper Free

20 — CQ2WB Bore size — Stroke D (C) (M)

• Copper free

• ø12, ø16, ø20, ø25, ø32, ø40, ø50
ø63, ø80, ø100

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Double acting double rod
Bore size	ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100
Proof pressure	1.5MPa
Max. operating press.	1.0MPa
Rubber bumper	None
Piping	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole
Auto switch	Attachable

Series CDQ2 Auto Switch Specifications

* Refer to p.6-15 for details of auto switch.

How to Order

Refer to p.1-446 for How to Order.

Compact Cylinder/Standard: Single Acting Spring Return/Extend

Series CQ2

ø12, ø16, ø20, ø25, ø32, ø40, ø50

How to Order

Standard CQ2 B 20 10 S

With auto switch CDQ2 B 20 10 S A73 S

Thread Port (ø32 to ø50)

—	Rc(PT)
E	G(PF)

With auto switch (Built-in magnet)

Mounting

B	Through-hole (Standard)	F	Front flange
A	Both ends tapped	G	Rear flange
L	Foot	D	Double clevis

*Mounting brackets are shipped not assembled with the cylinder.

Auto switch

—	Without auto switch (Built-in magnet)
---	---------------------------------------

*Refer to table below on auto switch model no.

Number of auto switches

—	2
S	1
n	n

Action

S	Single acting spring return
T	Single acting spring extend

Body option

—	Standard
F	Rear boss mount
M	Rod end male thread

*Combination of body option is possible. (Ex.) FM

Bore size

12	12mm
16	16mm
20	20mm
25	25mm
32	32mm
40	40mm
50	50mm

Piping

—	Screw-in piping
F	Built-in One touch fitting (1)

Note 1) Built-in One-touch fitting: Bore size ø32 to ø50.

Refer to standard stroke table on p.1-463

Specifications

Model	Pneumatic (Non-lube)
Fluid	Air
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Ambient and fluid temperature	Without auto switch: -10°C to 70°C (No freezing)
	With auto switch: -10°C to 60°C (No freezing)
Rubber bumper	None
Rod end thread	Female thread
Tolerance of rod end thread	JIS class 2
Tolerance of stroke length	+1.0 0
Mounting	Through-hole
Piston speed	50 to 500mm/s

JIS symbol

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

32, 40 50	BQ-2	- Switch mounting screw (M3 X 10 ℓ) - Switch spacer - Switch mounting nut		

[Stainless steel mounting bolt set]

The set of stainless steel mounting screws (with nuts) described below is available and can be used depending on the operating environment.

(The spacers for auto switches must be ordered separately, as they are not included.)

BBA2: For D-A7/A8/F7/J7

The stainless steel bolts described above are used when the D-F7BAL switch is shipped mounted on a cylinder. When the switches are shipped as individual parts, the BBA2 set is included.

Mounting Bolt for CQ2

Special long bolt for through-hole mounting is available as option.

How to Order: Specify the required bolts

Example) Bolt M3 X 25 ℓ 4 pcs.

BQ-2	ø32 to ø50	1.5

Construction

Spring return

Spring extend

Port size M5 X 0.8

Component Parts

No.	Description	Material	Note
①	Cylinder tube	Aluminum alloy	Hard anodized
②	Piston	Aluminum alloy	Chromated
③	Piston rod	Stainless steel	ø12 to ø25
		Carbon steel	ø32 to ø50, Hard chrome plated
④	Collar	Aluminum bearing alloy	ø12 to ø40, Anodized
		Aluminum alloy casting	ø50, Chromated, coated
⑤	Snap ring	Carbon tool steel	Phosphate coating
⑥	Bushing	Lead bronze casting	Used for only ø50
⑦	Return spring	Piano wire	Zinc chromated
⑧	Bronze element	Sintered metal BC	In case of port size
⑨	Snap ring	Carbon tool steel	1/8, 1/4
⑩	Plug with fixed orifice	Lead bronze casting	In case of port size M5
⑪	Magnet	—	—

* Piston and piston rod of spring extend type (T type) bore size ø20 or larger are combined. (Stainless steel)

No.	Description	Mat'l	Note
⑫	Piston seal	NBR	
⑬	Rod seal	NBR	
⑭	Gasket	NBR	

Replacement Parts: Seal Kits

Series	Bore size	Kit No.	Contents
Pneumatic	12	CQ2B12-PS	Kits include items ⑫, ⑬ and ⑭ from the table above.
	16	CQ2B16-PS	
	20	CQ2B20-PS	
	25	CQ2B25-PS	
	32	CQ2B32-PS	
	40	CQ2B40-PS	
	50	CQ2B50-PS	

* Seal kit consist of item ⑫, ⑬ and ⑭ contained in one kit, and can be ordered using the order number for each respective tube bore size.

Compact Cylinder/Standard: Single Acting Spring Return/Extend Series **CDQ2**

Mounting Bolt for CDQ2 with Auto Switch

Special long bolt for through hole mounting is available as option.
How to Order: Specify the required bolts.
Example) Bolt M3 X 35 ℓ 2 pcs.

Spring return

Spring extend

Compact Cylinder Non-rotating Rod: Double Acting Single Rod

Series CQ2K

ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63

How to Order

Standard CQ2K B 20 30 D

With auto switch CDQ2K B 20 30 D A73 S

Thread Port (ø32 to ø63)

—	Rc(PT)
E	G(PF)

With auto switch (Built-in magnet)

Non-rotating rod

Mounting

B	Through-hole (Standard)	ø12 to ø63
A	Both ends tapped	
L	Foot	ø40, ø50
F	Front flange	ø63
G	Rear flange	
D	Double clevis	

*Mounting brackets are shipped not assembled with the cylinder.

Auto switch

—	Without auto switch (Built-in magnet)
---	---------------------------------------

*Refer to below table for selection of auto switch.

Number of auto switches

—	2
S	1
n	n

Body option

—	Standard (Rod end female thread)
F	Rear boss mount
C	With rubber bumper (only ø12 with switch)
M	Rod end male thread

*Body combination is possible.
FM

Action

D	Double acting
---	---------------

Cylinder stroke (mm)
Refer to Standard Stroke Table on p.1-481

Bore size	12 ⁽¹⁾	16	20	25	32	40	50	63
	12mm	16mm	20mm	25mm	32mm	40mm	50mm	63mm

Note 1) When ø12 with switch is required, the body option should be with rubber bumper (C).
Ex.) CDQ2KB12-30DC

Piping

—	Screw-in piping
F	With built-in One-touch fitting ⁽²⁾

Note 2) Bore size with built-in One-touch fitting is from ø32 to 63.

Mounting Bracket Part Number

Bore (mm)	Foot ⁽³⁾	Flange	Double clevis ⁽⁵⁾
40	CQ-L040	CQ-F040	CQ-D040
50	CQ-L050	CQ-F050	CQ-D050
63	CQ-L063	CQ-F063	CQ-D063

Note 3) When ordering foot brackets, 2pcs. should be ordered for each cylinder.

Note 4) The attached parts for each brackets are as follows.
Foot, Flange: Body mounting bolt
Double clevis: Clevis pin, C shape snap ring for axis, Body mounting bolt

Note 5) A clevis pin and snap ring are packed with the double clevis.

Applicable Auto Switches

Rear boss mount		●	●	●	●	●	●	●	●

Note 1) When requiring style without auto switch, only 5 stroke uses M5.

Note 2) When requiring style with built-in fitting, dimensions of ø32 and 5stroke are same as 10stroke.

Standard Specifications

Style	Pneumatic (Non-lube)
Fluid	Air
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Ambient and fluid temperature	Without auto switch: -10°C to 70°C (No freezing)
	With auto switch: -10°C to 60°C (No freezing)
Rubber bumper	None
Rod end thread	Female thread
Rod end tolerance	JIS class 2
Stroke length tolerance	+1.0 0
Mounting	Through-hole
Piston speed	50 to 500mm/s

⚠ Caution

Snap Ring Installation Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting

- When removing a load, be sure to secure the flats of the piston rod on the load side.
- If this is done without securing the piston rod on the load side, be aware that the coupled (screwed-in) portion of the piston rod could become loosened.

- Using a non-rotating rod cylinder
 - Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod. If rotational torque is applied, the non-rotating guide will deform, causing a loss of non-rotating accuracy. Use the chart below as a guide for the allowable rotational torque ranges.

Allowable torque kgf-cm or less	12	16	20	25	32	40	50	63
	0.4	1.5	2.0	2.5	4.5	4.5	4.5	4.5

- Operate the cylinder in such a way that the load to the piston rod is always applied in the axial direction.

Allowable Kinetic Energy

Unit: J

Copper Free

20 — CQ2KB Bore size Stroke D (M)

• Copper Free Series • **ø16, ø20, ø25, ø32, ø40, ø50, ø63**

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Double acting single rod
Cylinder bore size	ø16, ø20, ø25, ø32, ø40, ø50, ø63
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	None
Piping	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole
Auto switch	Mountable

Series CDQ2K Auto Switch Specifications

* Refer to p.6-15 for details of auto switch.

* Seal kits consist of items ⑫, ⑬ and ⑭ contained in one kit, and can be ordered using the order number for each tube bore size.

Compact Cylinder/Non-rotating Rod: Double Acting Single Rod **Series CDQ2K**

Mounting Bolt for CDQ2KB with Auto Switch

Special long bolt for through-hole mounting of CDQ2KB is available.

How to Order: Specify the required bolts

Example) Bolt M3 X 35 ℓ 2pcs.

[Mounting screw set made by stainless steel]

Following stainless steel mounting screw set (included nut) is provided. Use them in accordance with environment.

(Auto switch interface is not included. Order it separately)

BBA2: For D-A7/A8/F7/J7

When D-F7BAL mounted on cylinder is required, the stainless steel screw mentioned above is used at shipping. When auto switch unit is shipped, BBA4 is attached.

Ø32 With Auto Switch

Technical drawing of the front view of a 3D-printed part. The part is roughly rectangular with rounded corners and a central circular feature. It has four mounting holes at the corners and two protruding pins on the left. Dimensions are indicated: a width of 36.5, a height of 59, and a central hole diameter of Ø13.

1-491

(For those without auto switches, refer to dimensions table because dimensions of A and B vary.)

	Rod end male thread		●	●	●	●	●	●	●

Note 1) Without auto switch: M5

Note 2) When the style with built-in fitting is required, dimensions of ø32, 5 stroke are same as 10 stroke.

Symbol

Non-rotating rod/Double Rod

Standard Specifications

Style	Pneumatic (Non-lube)
Fluid	Air
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Ambient and fluid temperature	Without auto switch: -10°C to 70°C (No freezing)
	With auto switch: -10°C to 60°C (No freezing)
Rubber bumper	None ⁽³⁾
Rod end thread	Female thread
Rod end thread tolerance	JIS class 2
Stroke length tolerance	+1.0 0
Mounting	Through-hole
Piston speed	50 to 500mm/s

Note 3) ø12, with switch: Rubber bumper is standard.

Minimum Operating Pressure

Unit: MPa

Bore size (mm)	12	16	20	25	32	40	50	63
Min. operating press	0.07	0.07	0.05	0.05	0.05	0.05	0.05	0.05

Non-rotating Accuracy

Bore size (mm)	12	16	20	25	32	40	50	63
Non-rotating accuracy	±2°	±1°	±1°	±1°	±1°	±1°	±1°	±0.8°

Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting

- When removing a load, be sure to secure the wrench flats of the piston rod on the load side.
- If this is done without securing the piston rod on the load side, be aware that the coupled (screw-in) portion of the piston rod could become loosened.

- Using a non-rotating rod cylinder
 - Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod. If rotational torque is applied, the non-rotating guide will be deformed, causing a loss of non-rotating accuracy. Use the chart below as a guide for the allowable rotational torque ranges.

Rotating torque. kgfcm or less	ø12	ø16	ø20	ø25	ø32	ø40	ø50	ø63
	0.4	1.5	2.0	2.5	4.5	4.5	4.5	4.5

- Operate the cylinder in such a way that the load to the piston rod is always applied in the axial direction.

Copper Free

20 —CQ2KWB Bore Size — Stroke D (M)
 • Copper Free Series • **ø16, ø20, ø25, ø32, ø40, ø50, ø63**

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Double acting double rod
Cylinder bore size	ø16, ø20, ø25, ø32, ø40, ø50, ø63
Proof Pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	None
Piping	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole
Auto switch	Mountable

Series CDQ2KW Auto Switch Specifications

* Refer to p.6-15 for details of auto switch.

Auto Switch Mounting Bracket Part No.

Bore size (mm)	Part No.	Note	Applicable switch	
			Reed switch	Solid state switch
12/16 20/25	BQ-1	- Switch mounting screw (M3 X 8 ℓ) - Square nut	D-A7□, A80 D-A73C, A80C D-A7□H, A80H D-A79W	D-F7□, J79 D-F7□V D-J79C D-F7□W, J79W D-F7□WV D-F7BAL D-F7□F D-F7NTL
32/40 50/63	BQ-2	- Switch mounting screw (M3 X 10 ℓ) - Switch spacer - Switch mounting nut		

* Mounting screw set made by stainless steel

Following stainless steel mounting screw set (including nut) is provided. Use them in accordance with environment. (Auto switch interface is not included. Order it separately.)

BBA2: For D-A7/A8/F7/J7

When D-F7BAL mounted on cylinder is required, the stainless steel screw mentioned above is used at shipping. When auto switch unit is shipped, BBA2 is attached.

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting/Removing

- Do not remove the hexagon socket set screw on the side of the rod.
- Be aware that if the hexagon socket set screw is removed with compressed air supplied to the cylinder, an internal steel ball could fly out or the compressed air could be discharged, leading to injury to humans or damage to peripheral equipment.

Auto Switch Mounting Bracket Part No.

Bore size (mm)	Part No.	Note	Applicable switch	
			Reed switch	Solid state switch
12/16 20/25	BQ-1	• Switch mounting screw (M3 X 8 ℓ) • Square nut	D-A7□, A80 D-A73C, A80C D-A7□H, A80H D-A79W	D-F7□, J79 D-F7□V, D-J79C D-F7□W, J79W D-F7□WV, D-F7BAL D-F7□F, D-F7NTL
32/40 50/63 80/100	BQ-2	• Switch mounting screw (M3 X 10 ℓ) • Switch mounting screw • Switch mounting nut		

*Stainless steel mounting bolt set
The set of stainless steel mounting screws (with nut) described below is available and can be used depending on the operating environment. (The spacer for auto switches must be ordered separately, as they are not included.)
BBA2: For D-A7/A8/F7/J7
The stainless steel bolts described above are used when the D-F7BAL type switch is shipped mounted on a cylinder. When the switches are shipped as individual parts, the BBA2 set is included.

Copper Free

20 — CQP2B Bore size Stroke D
 • Copper free series • ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Double acting single rod
Cylinder bore size	ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100
Proof Pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	None
Piping	Screw-in piping
Piston speed	50 to 500mm/s
Mounting	Through-hole
Auto switch	Mountable

Compact Cylinder/Axial Piping: Double Acting Single Rod **Series CDQP2**

Mounting Bolt for CDQP2 with Auto Switch

Special bolt for through-hole of CDQP2B mounting is available as option.

How to Order: Specify the required bolts.

Example) Bolt M3 X 35 ℓ 2pcs.

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

*Stainless steel mounting bolt set

The set of stainless steel mounting screws (with nut) described below is available and can be used depending on the operating environment. (The spacer for auto switches must be ordered separately, as they are not included.)

BBA2: For D-A7/A8/F7/J7

The stainless steel bolts described above are used when the D- F7BAL type switch is shipped mounted on a cylinder. When the switches are shipped as individual parts, the BBA2 set is included.

Component Parts

No.	Description	Material	Note
①	Cylinder tube	Aluminum alloy	Hard anodized
②*	Piston	Aluminum alloy	Chromated
③	Piston rod	Stainless steel	ø12 to ø25
		Carbon steel	ø32 to ø50, Hard chrome plated
④	Collar	Aluminum bearing alloy	ø12 to ø40, Anodized
		Aluminum alloy casting	ø50, Chromated, coated
⑤	Snap ring	Carbon tool steel	Phosphate coating
⑥	Bushing	Lead bronze casting	Used for only ø50
⑦	Return spring	Piano wire	Zinc chromated
⑧	Bronze element	Sintered metal BC	Port size Rc(PT)1/8, 1/4
⑨	Snap ring	Carbon tool steel	
⑩	Plug with fixed orifice	Alloy steel	Port size M5
⑪	Steel ball	Carbon steel	
⑫	Hexagon socket set screw	Alloy steel	Zinc chromated
⑬	Rod end nut	Carbon steel	Nickel plated
⑭	Piston seal	NBR	
⑮	Rod seal	NBR	
⑯	Gasket	NBR	

* On spring extend (T type), piston and piston rod are integrated (Stainless steel).

Replacement Parts: Seal Kits

Bore size (mm)	Kit No.	Contents
12	CQ2B12-PS	A set includes ⑭, ⑮ and ⑯.
16	CQ2B16-PS	
20	CQ2B20-PS	
25	CQ2B25-PS	
32	CQ2B32-PS	
40	CQ2B40-PS	
50	CQ2B50-PS	

* Seal kits are sets consisting of items ⑭, ⑮ and ⑯, which can be ordered using the kit number for each cylinder bore size.

Copper Free

20 — CQP2B Bore size — Stroke $\frac{S}{T}(M)$
 • Copper free • ø12, ø16, ø20, ø25, ø32, ø40, ø50

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Action	Single acting single rod

Rod end male thread	Male thread	1.5	3	6	12	26	27	53
	Nut	1	2	4	8	17	17	32

Calculation example: CDQP2B32-10SM

• Basic weight: CDQP2B32-10S.....242g

• Additional weight: Rod end male thread.....43g
285g

Add each weight of auto switches and mounting brackets when auto switches are mounted.

Weight/Auto Switch Mounting Bracket

Bracket part.	Bore size	Weight (g)
BQ-1	ø12 to ø25	1.5
BQ-2	ø32 to ø50	1.5

Construction

Spring return

Spring extend

A-A section (Rod side port) B-B section (Head side port) A-A section (Rod side port) B-B section (Head side port)

Component Parts

No.	Description	Material	Note
①	Cylinder tube	Aluminum alloy	Hard anodized
②	Piston *	Aluminum alloy	Chromated
③	Piston rod *	Stainless steel	ø12 to ø25
		Carbon steel	ø32 to ø50, Hard chrome plated
④	Collar	Aluminum bearing alloy	ø12 to ø40, Anodized
		Aluminum alloy casting	ø50, Chromate, coated
⑤	Snap ring	Carbon tool steel	Phosphate coating
⑥	Bushing	Lead bronze casting	Used for only ø50
⑦	Return spring	Piano wire	Zinc chromated
⑧	Bronze element	Sintered metal BC	Port size Rc(PT)1/8, 1/4
⑨	Snap ring	Carbon tool steel	
⑩	Plug with fixed orifice	Alloy steel	Port size M5
⑪	Steel ball	Bearing steel	
⑫	Hexagon socket set screw	Alloy steel	Zinc chromated
⑬	Magnet	—	
⑭	Piston seal	NBR	
⑮	Rod seal	NBR	
⑯	Gasket	NBR	

* On spring extend (T type), piston and piston rod are integrated (Stainless steel).

Replacement Parts: Seal Kits

Bore size (mm)	Kit No.	Contents
12	CQ2B12-PS	A set includes. ⑭, ⑮ and ⑯
16	CQ2B16-PS	
20	CQ2B20-PS	
25	CQ2B25-PS	
32	CQ2B32-PS	
40	CQ2B40-PS	
50	CQ2B50-PS	

* Seal kits are sets consisting of items ⑭, ⑮ and ⑯, which can be ordered using the kit number for each cylinder bore size.

Compact Cylinder/Axial Piping: Single Acting Single Rod *Series CDQP2*

Mounting Bolt for CDQP2 with Auto Switch

Special bolt for through-hole mounting of CDQP2B is available as option.

How to Order: Specify the required bolts
Example) Bolt M3 X 35 ℓ 2 pcs.

Spring return

Model	C	D	Mounting bolt
CDQP2B12-5S	5.5	35	M3 X 35 ℓ
-10S		40	X 40 ℓ
CDQP2B16-5S	8	40	M3 X 40 ℓ
-10S		45	X 45 ℓ
CDQP2B20-5S	10.5	40	M5 X 40 ℓ
-10S		45	X 45 ℓ
CDQP2B25-5S	9.5	40	M5 X 40 ℓ
-10S		45	X 45 ℓ
CDQP2B32-5S	9	40	M5 X 40 ℓ
-10S		45	X 45 ℓ
CDQP2B40-5S	7.5	45	M5 X 45 ℓ
-10S		50	X 50 ℓ
CDQP2B50-10S	12.5	55	M6 X 55 ℓ
-20S		60	X 60 ℓ

Spring extend

Model	C	D	Mounting bolt
CDQP2B12-5T	6.1	40	M3 X 40 ℓ

⚠ Precautions

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting Bolt for CQ2

Special bolt for through-hole of CQ2B is available as option.

How to Order: Specify the required bolts.

Example) Bolt M12 X 100 ℓ 4 pcs.

Note 1) To install a through hole type mounting bolt, make sure to use the flat washer that is provided.

Note 2) Consult SMC regarding mounting bolts for strokes that exceed 100mm. Use the OA screw provided on the cylinder tube to secure the cylinder.

[Stainless steel mounting bolt set]

The set of stainless steel mounting screws (with nut) described below is available and can be used depending on the operating environment. (The spacer for auto switches must be ordered separately, as they are not included.)

BBA2: For D-A7/A8/F7/J7

The stainless steel bolts described above are used when the D-F7BAL type switch is shipped mounted on a cylinder. When the switches are shipped as individual parts, the BBA2 set is included.

160	5654	9424	13194

⚠ Precautions

⚠ Caution

Snap Ring Installation/Removal

- For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Mounting

- When removing a load, be sure to secure the wrench flats of the piston rod on the load side.
- If this is done without securing the piston rod on the load side, be aware that the coupled (screw-in) portion of the piston rod could become loosened.

Mounting Bolt for CQ2

Special bolt for through-hole mounting of CQ2WB is available as option.
 How to Order: Specify the required bolts.

Example) Bolt M12 X 100 ℓ 4 pcs.

Note 1) To install a through hole type mounting bolt, make sure to use the flat washer that is provided.

Note 2) Consult SMC regarding mounting bolts for strokes that exceed 100mm.
 Use the OA screw provided on the cylinder tube to secure the cylinder.

Series CQ2

ø180 and ø200 added to CQ2 compact cylinder series.

Large bore sizes

ø180 and ø200

Compact and light weight

Substantial reductions in dimensions and weight compared to tie-rod type cylinders

Auto switches

- No protrusion from cylinder body
- Can be mounted on four sides

Series		Overall length mm	Weight kg
CQ2	ø180	219	16.6
	ø200	226	20.6
CS1	ø180	385	30.4
	ø200	390	39.5

Comparison with 100mm stroke and rod end male threads

Variations

Series	Action	Type	Size	Standard strokes	Rod end configuration	Applicable auto switch models
CQ2	Double acting	Single rod	180	10 20 30 40 50 75 100 125 150 175 200 250 300	Female threads Male threads	Reed switches: D-Z7, Z8 Solid state switches: D-Y5, Y6, Y7
		Double rod	200			

Compact cylinder variations

A wide range of 15 sizes from ø12 to ø200

Compact Cylinder/Double Acting: Single Rod

Series CQ2

ø180, ø200

** Auto switches marked with a "O" symbol are produced upon receipt of order.

Series CQ2

Symbol

Double acting: Single rod

Specifications

Fluid	Air
Proof pressure	1.05MPa
Maximum operating pressure	0.7MPa
Minimum operating pressure	0.05MPa
Ambient and fluid temperature	Without auto switch: -10°C to 70°C (with no freezing)
	With auto switch: -10°C to 60°C (with no freezing)
Lubrication	Non-lube
Cushion	Rubber bumper
Rod end threads	Female threads
Thread tolerance	JIS class 2
Stroke length tolerance	+1.4 0
Mounting brackets	Basic type
Mounting	Through hole/Double end tapped

Standard Strokes

Bore size (mm)	Standard strokes (mm)
180, 200	10, 20, 30, 40, 50, 75, 100, 125, 150, 175, 200, 250, 300

• Manufacture of intermediate strokes
Intermediate strokes in 5mm increments can be manufactured by installing spacers inside standard stroke cylinders.
Example) CQ2B180-160DC is produced by installing a 15mm spacer in a standard stroke cylinder CQ2B180-175DC.

Minimum Strokes for Mounting of Auto Switches

		D-Z7, Z8	D-Y5, Y6, Y7	DD-Y7□W, D-Y7BAL
180, 200	2 pcs. (different sides, same side)	10	5	15
	1 pc.	5	5	10

Theoretical Output/Double Acting Type

Unit: N

Bore size (mm)	Operating direction	Operating Pressure (MPa)					
		0.2	0.3	0.4	0.5	0.6	0.7
180	IN	4838	7257	9676	12095	14514	16933
	OUT	5089	7634	10179	12724	15268	17812
200	IN	6032	9048	12064	15080	18096	21112
	OUT	6283	9425	12566	15708	18850	21991

Do not apply loads greater than 50% of the theoretical output.

Weight Table

Unit: kg

Bore size (mm)	Standard strokes (mm)													With magnet	Rod end male threads
	10	20	30	40	50	75	100	125	150	175	200	250	300	Additional weight	Additional weight

Example) CDQ2B180-100DCM

Basic weight	CQ2B180-100DC	15.80kg
Additional weight	Built-in magnet	0.08kg
	Rod end male threads	0.74kg
Total		16.62kg

Construction

Rod end male threads

Parts list

No.	Description	Material	Note
1	Cylinder tube	Aluminum alloy	Hard anodized
2	Head cover	Cast iron	Nickel plated
3	Piston	Aluminum alloy casting	Chromated
4	Piston rod	Carbon steel	Hard chrome plated
5	Rod cover	Cast iron	Nickel plated
6	Snap ring	Carbon tool steel	Phosphate coated
7	Bumper	Polyurethane	
8	Bushing	Lead-bronze casting	
9	Wear ring	Resin	
10	Magnet	—	CDQ2B only

Parts list

No.	Description	Material	Note
11	Rod end nut	Rolled steel	Nickel plated
12	Piston seal	NBR	
13	Rod seal	NBR	
14	Tube gasket	NBR	

Replacement parts: Seal kits

Bore size (mm)	Seal kit No.	Contents
180	CQ2B180-PS	A set of Nos.12, 13 and 14 from the table above
200	CQ2B200-PS	

Mounting

Mounting/Through hole type mounting bolts are available.

How to order: Add "Bolt" in front of the bolts to be used.

(Example) Bolt M18 x 125 ℓ

Note1) When mounting with through hole type mounting bolts, be sure to use the flat washers which are included.

Note 2) When mounting a cylinder with a stroke over 100mm, use the section A mounting threads.

Model	C	D	Mounting bolt
C (D) Q2B180- 10DC	36	125	M18 x 125 ℓ
C (D) Q2B180- 20DC		135	M18 x 135 ℓ
C (D) Q2B180- 30DC		145	M18 x 145 ℓ
C (D) Q2B180- 40DC		155	M18 x 155 ℓ
C (D) Q2B180- 50DC		165	M18 x 165 ℓ
C (D) Q2B180- 75DC		190	M18 x 190 ℓ
C (D) Q2B180-100DC		215	M18 x 215 ℓ

Model	C	D	Mounting bolt
C (D) Q2B200- 10DC	39	135	M18 x 135 ℓ
C (D) Q2B200- 20DC		145	M18 x 145 ℓ
C (D) Q2B200- 30DC		155	M18 x 155 ℓ
C (D) Q2B200- 40DC		165	M18 x 165 ℓ
C (D) Q2B200- 50DC		175	M18 x 175 ℓ
C (D) Q2B200- 75DC		200	M18 x 200 ℓ
C (D) Q2B200-100DC		225	M18 x 225 ℓ

Series CQ2

Dimensions

Dimensions are the same with and without auto switches.

Note 1) 2 x 4-M22 threads through for strokes of 20mm or less.

Note 1) 2 x 4-M22 threads through for strokes of 20mm or less.

Compact Cylinder/Double Acting: Double Rod

Series CQ2W

ø180, ø200

Auto Switch Mounting

Auto Switches/Proper Mounting Position for Stroke End Detection

Proper mounting position (mm)

Bore size (mm)	A	B
180	38.5	38.5
200	42	42

* Dimensions are the same for single rod and double rod.

Minimum Strokes for Mounting of Auto Switches

		D-Z7, Z8	D-Y5, Y6, Y7	D-Y7□W D-Y7BAL
180, 200	2 pcs. (different sides, same side)	10	5	15
	1 pc.	5	5	10

Auto Switch Mounting

When mounting an auto switch, insert it into the cylinder's switch mounting groove from the direction shown in the drawing below. After setting it in the desired mounting position, tighten the switch mounting screw which is included using a flat head watchmakers screw driver.

Note) When tightening the auto switch mounting screw (included with auto switch), use a watchmakers screw driver with a handle about 5 to 6mm in diameter. Also tighten with a torque of 0.05 to 0.1N·m. As a rule, it should be turned about 90° past the point at which tightening can be felt.

⚠ Precautions

⚠ Caution

Snap Ring Installation/Removal

- ① For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- ② Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.

Intermediate Strokes (except standard strokes)

Method	Spacer is attached on standard stroke body.		Exclusive body	
Model No.	Refer to How to Order for standard model no.		Specify "XB10" at the end of standard model number.	
Method	Intermediate strokes at 5mm intervals are available by using spacers with standard stroke cylinders.		Intermediate strokes at 1mm intervals are available by using special body with required stroke.	
Stroke range	Bore size	Stroke range	Bore size	Stroke range
	32 to 100	105 to 300	32 to 100	101 to 300
Example	Model no. : CQ2A50-165DC CQ2A50-17DC with 10mm width spacer. B dimension is 230.5mm.		Model no. : CQ2A50-165DC-XB10 Makes 165 stroke tube. B dimension is 220.5mm.	

To order a spacer installed styles with intermediate strokes at 1mm intervals, consult SMC beforehand.

Series CQ2

Copper Free

20 — CQ2A Bore size — Stroke DC(M)
 • Copper Free Series • **ø32, ø40, ø50, ø63, ø80, ø100**

To eliminate influences of copper ions or halogen ions during CRT manufacturing processes, copper and fluorine materials are not used as component parts.

Specifications

Style	Double acting single rod
Bore size	ø32, ø40, ø50, ø63, ø80, ø100
Proof pressure	1.5MPa
Max. operating pressure	1.0MPa
Rubber bumper	With (standard equipment)
Piping	Screw-in piping
Piston speed	50 to 500mm/S
Mounting	Both ends tapped
Auto switch	Mountable

Allowable Lateral Load at Rod End

⑫	Magnet	—	For only CDQ2□A
⑬*	Rod seal	NBR	
⑭*	Piston seal	NBR	
⑮*	Tube gasket	NBR	

Replacement Parts: Seal Kits

Bore size (mm)	Kit no.	Contents
32	CQ2A32-L-PS	A set includes ⑬, ⑭ and ⑮.
40	CQ2A40-L-PS	
50	CQ2A50-L-PS	
63	CQ2A63-L-PS	
80	CQ2A80-L-PS	
100	CQ2A100-L-PS	

*Seal kits are sets consisting of items ⑬, ⑭ and ⑮, which can be ordered using the kit number for each cylinder bore size.

ø32 to ø50

The dimensions are the same with or without an auto switch.

Technical drawing of a 2-P (Port size) cylinder. The drawing shows a side view of the cylinder with a port on the left. Key dimensions and labels include:

- Q**: Port size, indicated at both ends of the cylinder.
- 2-P (Port size)**: Label pointing to the port on the left.
- ø Thg**: Threaded hole diameter, indicated on the right side of the cylinder.
- ø D**: Outer diameter, indicated on the right side of the cylinder.
- 5**: Dimension indicating the distance from the port center to the cylinder end.
- L**: Dimension indicating the distance from the port center to the cylinder end.
- B+Stroke**: Dimension indicating the total length of the cylinder.
- A+Stroke**: Dimension indicating the total length of the cylinder.

Above switch: D-A73/A80 Refer to p.1-550 for auto switch mounting position and mounting height.

Note 1) All the 125 to 200mm stroke types are in 25mm increments.

Note 2) Refer to p.1-427 for calculation of cylinder length with intermediate stroke.

Technical drawing of a double-acting hydraulic cylinder. The drawing shows the cylinder with its rod and end caps. Key dimensions and components are labeled:

- L**: Total length of the cylinder.
- B+Stroke**: Dimension across the top of the cylinder.
- LS+Stroke**: Dimension across the bottom of the cylinder.
- A+Stroke**: Dimension across the bottom of the cylinder, below LS+Stroke.
- X** and **Y**: Dimensions of the rod diameter at different points.
- LG**: Dimension of the rod end cap.
- Rod end male thread**: Label pointing to the thread on the rod end cap.

*Solid state switches marked with a "O" are manufactured produced upon receipt of order.

Compact Cylinder/Anti-lateral Load **Series CQ2**

JIS symbol

Double acting/Single rod

Precautions

⚠ Caution

Snap Ring Installation/Removal

- ① For installation and removal, use an appropriate pair of pliers (tool for installing a C snap ring).
- ② Exercise caution even when using an appropriate pair of pliers (tool for installing a C snap ring), because of the possibility of the snap ring becoming detached from the tip of the pliers (tool for installing a C snap ring) and flying away, which could injure humans or damage the peripheral equipment. After installing the snap ring, make sure that it is placed securely in the ring groove before supplying air.
