

Features

Regulated Converters

- 10:1 Ultra Wide Input Voltage Range
- 3kVAC/1 Minute Reinforced Insulation
- UL/IEC/EN60950-1 Certified, CE Marked
- EN50155 Compliant
- Efficiency Up To 90%
- -40°C To +93.5°C Baseplate Temperature Range

Description

The half-brick RPA200H series DC/DC converter is designed for railway rolling stock and high voltage battery applications. It has a 10:1 input voltage range to cover all input voltages from nominal 24VDC up to 110VDC (including EN50155 transients) in a single product and offers isolated and regulated 12V or 24VDC outputs. The converter has a consistently high efficiency over the entire input voltage range and comes with a metal baseplate to permit a wide operating temperature range from -40°C to +93.5°C (when suitably cooled). The case is fitted with threaded inserts to allow secure mounting to the PCB or bulk-head for use in high shock and vibration environments. The converter is compliant to EN50155 and certified to UL/IEC/EN60950 and comes with a three year warranty.

Selection Guide

Part Number	Nom. Input Voltage Range ⁽¹⁾ [VDC]	Output Voltage [VDC]	Output Current [A]	Efficiency typ. ⁽²⁾ [%]	Max. Capacitive Load ⁽³⁾ [μF]
RPA200H-11012SRUW ⁽⁴⁾	16.8-137.5	12	17	90	2200
RPA200H-11024SRUW ⁽⁴⁾	16.8-137.5	24	8.5	88	1000

Notes:

Note1: Refer to input voltage graph

Note2: Efficiency is tested at nominal input and full load at +25°C ambient

Note3: Max. Cap Load is tested at nominal input and full resistive load

Model Numbering

Ordering Examples

RPA200H-11012SRUW/P = 110V Input, 12V Output, Single, Pos. CTRL function

RPA200H-11012SRUW/N = 110V Input, 12V Output, Single, Neg. CTRL function

Notes:

Note4: standard part is with suffix "/P" for positive logic (1=ON, 0=OFF) or add suffix "/N" instead for negative logic (0=ON, 1=OFF)

Specifications (measured @ ta = 25°C, nom. Vin, full load and after warm-up unless otherwise stated)

BASIC CHARACTERISTICS

Specifications (measured @ $t_a = 25^\circ\text{C}$, nom. V_{in} , full load and after warm-up unless otherwise stated)

Input Voltage Range

Continuous full power operation is certified between 16.8V and 137.5V, including full load start-up.

Once running, the converter will operate for short periods of time over an extended input voltage range down to 14.4V and up to 156V, thus covering all EN50155 under-voltage and over-voltage transient conditions.

UNDER VOLTAGE LOCKOUT

The RPA200H series has an adjustable under voltage lockout which will shut down the converter according to following settings.

Input Voltage [VDC]	24	36	48	72	110
Turn Off Threshold [VDC]	14	20.6	27.5	40	64
Turn On Threshold [VDC]	16	24	32	46.5	74
Resistor R1 [kΩ]	open	27.4	13	6.81	3.57

OUTPUT VOLTAGE TRIMMING

Output Voltage Trimming

RPA200H-RUW converters offer the feature of trimming the output voltage over a certain range around the nominal value by using external trim resistors. The values for trim resistors shown in trim tables below are according to standard E96 values; therefore, the specified voltage may slightly vary.

Trim Calculation

Trim Up:

$$R_1 = \left(\frac{45}{\Delta V_{out}} + 40 \right) k\Omega \quad R_1 = \left(\frac{95}{\Delta V_{out}} + 90 \right) k\Omega$$

Practical Example:

Trim Up:

$$V_{out} = 12V, \Delta V_{out} = +10\% (13.2V)$$

$$R_1 = \left(\frac{45}{0.1} + 40 \right) k\Omega = 490k\Omega$$

V_{out} = Output Voltage

ΔV_{out} = Output Voltage Change in %

R_1 = trim up resistor

R_2 = trim down resistor

Trim Down:

$$R_2 = \left(\frac{5.11}{\Delta V_{out}} - 10.22 \right) k\Omega$$

Trim down:

$$V_{out} = 24V, \Delta V_{out} = -8\% (22V)$$

$$R_2 = \left(\frac{5.11}{0.08} - 10.22 \right) k\Omega = 53.65k\Omega$$

Trim down RPA200H series

Trim down	1	2	3	4	5	6	7	8	9	10	%
$R_2 =$	499	243	162	118	90.9	75	63.4	53.6	46.4	41.2	kOhms
Trim down	11	12	13	14	15	16	17	18	19	20	%
$R_2 =$	36.5	32.4	28.7	26.1	23.7	22.1	20	18.2	16.5	15.4	kOhms

EXTERNAL CAPACITOR

A $240\mu\text{F}/200\text{V}$ capacitor (C2) is required for normal operation.

To meet power supply interruptions, an external circuit comprised of a capacitor (C1), a 100R 10W resistor (R1) and a FX2000D diode (D1) is required.

C1	24Vin	36Vin	48Vin	72Vin	96Vin	110Vin
For 10ms	2300 μF	2300 μF	2300 μF	2300 μF	1200 μF	800 μF
For 30ms	6900 μF	6900 μF	6900 μF	6900 μF	3600 μF	2400 μF

REMOTE ON/OFF

Remote on/off can be controlled by an external voltage or transistor between the CTRL terminal and the $V_{in}(-)$ terminal.

For negative logic if the remote on/off feature is not used, short the on/off pin to $V_{in}(-)$.

For positive logic if the remote on/off feature is not used, leave the on/off pin floating.

REMOTE SENSE

The output voltage can be adjusted by both trim and remote sense. The maximum combined adjustment range is $\pm 10\%$. Derate the maximum output power if using the trim or sense function to increase the output voltage.

R_{W1} ... wire losses +
 R_{W2} ... wire losses -
 R_1 ... trim up resistor
 R_2 ... trim down resistor

Specifications (measured @ $t_a = 25^\circ\text{C}$, nom. V_{in} , full load and after warm-up unless otherwise stated)

REGULATION

Parameter	Condition		Value
Output Accuracy			$\pm 1.0\%$ max.
Line Regulation	$V_{in} = 16.8$ to 137.5V , $I_{out} = \text{full load}$		$\pm 0.01\%$ typ. to $\pm 0.2\%$ max.
Load Regulation	$I_{out} = I_{out \text{ min}}$ to $I_{out \text{ max}}$		$\pm 0.05\%$ typ. to $\pm 0.2\%$ max.
Transient Response	72V , $0.1\text{A}/\mu\text{s}$	12Vout	50% $I_{out \text{ max}}$ to 75%
			75% $I_{out \text{ max}}$ to 50%
		24Vout	50% $I_{out \text{ max}}$ to 75%
			75% $I_{out \text{ max}}$ to 50%

Accuracy vs Load

RPA200H-11012SRUW

RPA200H-11024SRUW

PROTECTION

Parameter	Condition		Value
Over Voltage Protection (OVP)			110-130%, auto recovery
Over Current Protection (OCP)			hiccup Mode
Over Temperature Protection (OTP)	$t_c = +125^\circ\text{C}$		automatic recovery after cooling down
Isolation Voltage ⁽⁵⁾	I/P to O/P	rated for 1 minute	3kVAC, 4.2kVDC
	I/P to Base	rated for 1 minute	3kVAC, 4.2kVDC
	O/P to Base	rated for 1 minute	3kVAC, 4.2kVDC
Isolation Resistance			$10\text{M}\Omega$ typ.
Isolation Capacitance			500pF
Leakage Current			0.42mA
Insulation Grade			Reinforced

Notes:

Note5: For repeat Hi-Pot testing, reduce the time and/or the test voltage

Note6: An input fuse is required if the mains supply is not over-current protected. Recommended fuse T40A slow blow type

Specifications (measured @ $t_a = 25^\circ\text{C}$, nom. V_{in} , full load and after warm-up unless otherwise stated)

ENVIRONMENTAL

Parameter	Condition	Value
