

## General Description

The TP3721/2 is wideband, low-noise, low-distortion dual operational amplifier, that offer rail-to-rail inputs / outputs and single supply operation down to 2.2V. They draw 1.6mA of quiescent supply current while featuring ultra-low distortion(0.0002% THD+N), as well as low input voltage-noise density (15nV/Hz) and low input current noise density (0.5fA/Hz). These features make the devices an ideal choice for applications that require low distortion and/or low noise. These amplifiers have inputs and outputs which swing rail-to-rail and their input common mode voltage range includes ground. The maximum input offset of these amplifiers is less than 5mV.

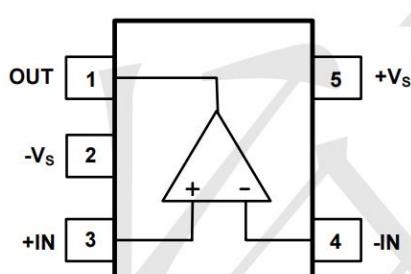

The TP3721/2 are unity gain stable with a gain-bandwidth of 10MHz. The TP3721/2 is available in SOT23-5 and SOP 8 packages. The extended temperature range of -40°C to +125°C over all supply voltages offers additional design flexibility.

## Ordering Information

Part Number	Package	QTY Per Reel	Reel Size
TP3721S5	SOT23-5	3000	12"
TP3722S8	SOP-8L	4000	12"
TP3722M8	MSOP-8L	3000	12"

## Pin Assignments

TP3721S5(SOT23-5)

TP3722M8/ S8 (SOP8 And MSOP8)

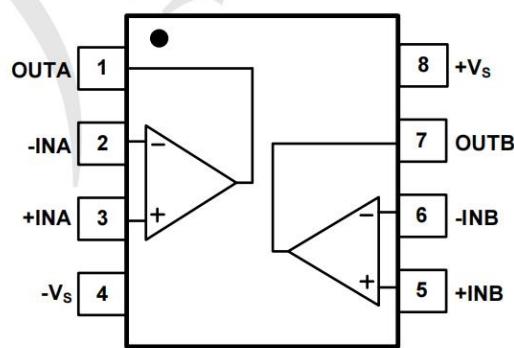

Figure 1. Pin Assignment Diagram (SOT23-5SOP -8L and MSOP-8L Package)

## Features

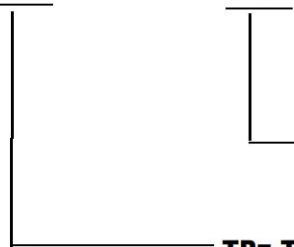

- Single-Supply Operation from +2.2V ~ +5.5V
- Rail-to-Rail Input / Output
- Gain-Bandwidth Product: 10MHz (Typ.)
- Low Input Bias Current: 10pA (Typ.)
- Low Offset Voltage: 5mV (Max.)
- Quiescent Current: 800µA per Amplifier (Typ.)
- Operating Temperature: -40°C ~ +125°C
- Available in SOT23-5 and MSOP-8 SOP8 Packages

## Applications

- Portable Equipment
- Mobile Communications
- Smoke Detector
- Sensor Interface
- Medical Instrumentation

**Note 1:** All devices are 100% production tested at  $TA = +25^\circ C$ ; all specifications over the automotive temperature range is guaranteed by design, not production tested.

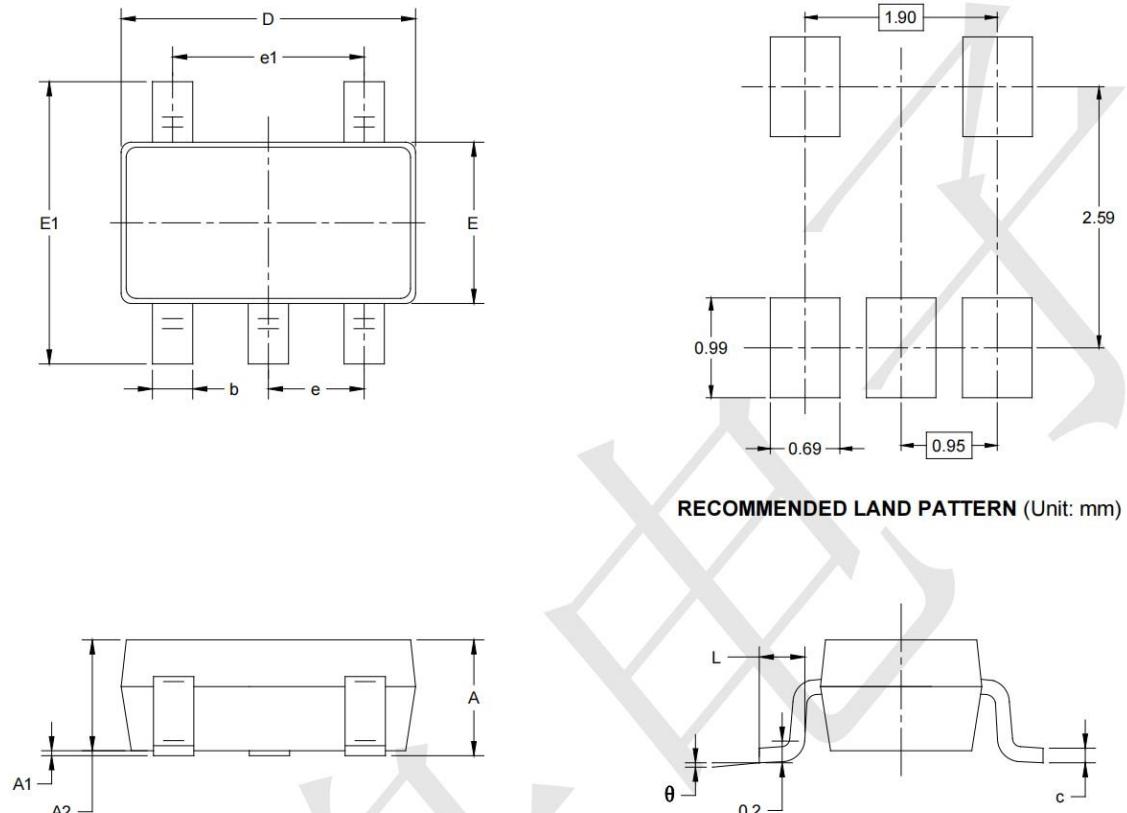

**Note 2:** Parameter is guaranteed by design.

**Note 3:** Peak-to-peak input noise voltage is defined as six times RMS value of input noise voltage.
