- What's New

To obtain the latest updates, features, bug fixes, or technical services through [mySupport](#) for the Nios® II processor, your licenses must be current. Use the following information to select the intellectual property (IP) core license that best meets your requirements.

## Nios II Processor

To obtain a new time-unlimited license file for the Nios II processor, you must purchase a standalone Nios II processor IP core license (ordering code: IP-NIOS). To renew your license, obtain a one-year renewal license (ordering code: IPR-NIOS). You can also purchase a value bundle that contains licenses for commonly used embedded IP cores—Embedded IP Suite (ordering code: IPS-EMBEDDED).

Contact your local [Altera representative](#) or use the contact information on the [Altera® software sales support](#) page to order today. See Table 1 for ordering information.

## Altera Embedded IP Suite

The Altera Embedded IP Suite is a value bundle of Altera's most popular embedded IP cores and software. This Embedded IP Suite contains all the building blocks for your embedded design, including the Nios II processor, DDR/DDR2/DDR3 memory controllers, a 16550 compatible UART, and a complete Ethernet solution with the Triple-Speed Ethernet MegaCore® function.

The Embedded IP Suite is priced at . If purchased separately, the value of the cores and software add up to over . Contact your local [Altera representative](#) or use the contact information on the [Altera® software sales support](#) page to order today. See Table 1 for ordering information.

Table 1. Summary of Ordering Codes and Pricing Information

Ordering Code	Price	Description	Ordering Information
<b>IPS-EMBEDDED (1)</b>		Embedded IP Suite: A value bundle that contains licenses for the Nios II processor IP core, Triple-Speed Ethernet IP core, 16550 compatible UART and high-performance , DDR/DDR2/DDR3 SDRAM IP cores and high-performance DDR SDRAM IP core	Contact your local Altera sales representative or distributor to place your order for a new Embedded IP license
<b>IPSR-EMBEDDED (1)</b>		Renewal license for the Embedded IP Suite	Contact your local Altera sales representative or distributor to renew your Embedded IP license
<b>IP-NIOS (1)</b>		Stand-alone license for the Nios II processor IP core	Contact your local Altera sales representative or distributor to place your order for a new Nios II processor IP license
<b>IPR-NIOS (1)</b>		Renewal license for the Nios II processor IP core	Contact your local Altera sales representative or distributor to renew your Nios II processor IP license

### Note:

- After you have purchased the license for your embedded IP core, you can obtain and manage the license through the [Self-](#)

## Legal Notice

Altera's [MegaCore Function License Agreement](#) governs the installation and use of the Nios II processor and the Nios II EDS software.

## IP Evaluation

Use the Altera [OpenCore Plus evaluation](#) flow to test drive these IP cores.

## Embedded Processing
