  - Chorus 1M (single core)
  - Chorus 4M (dual core)

*SPC5Studio V5.3

Hardware Development Tools
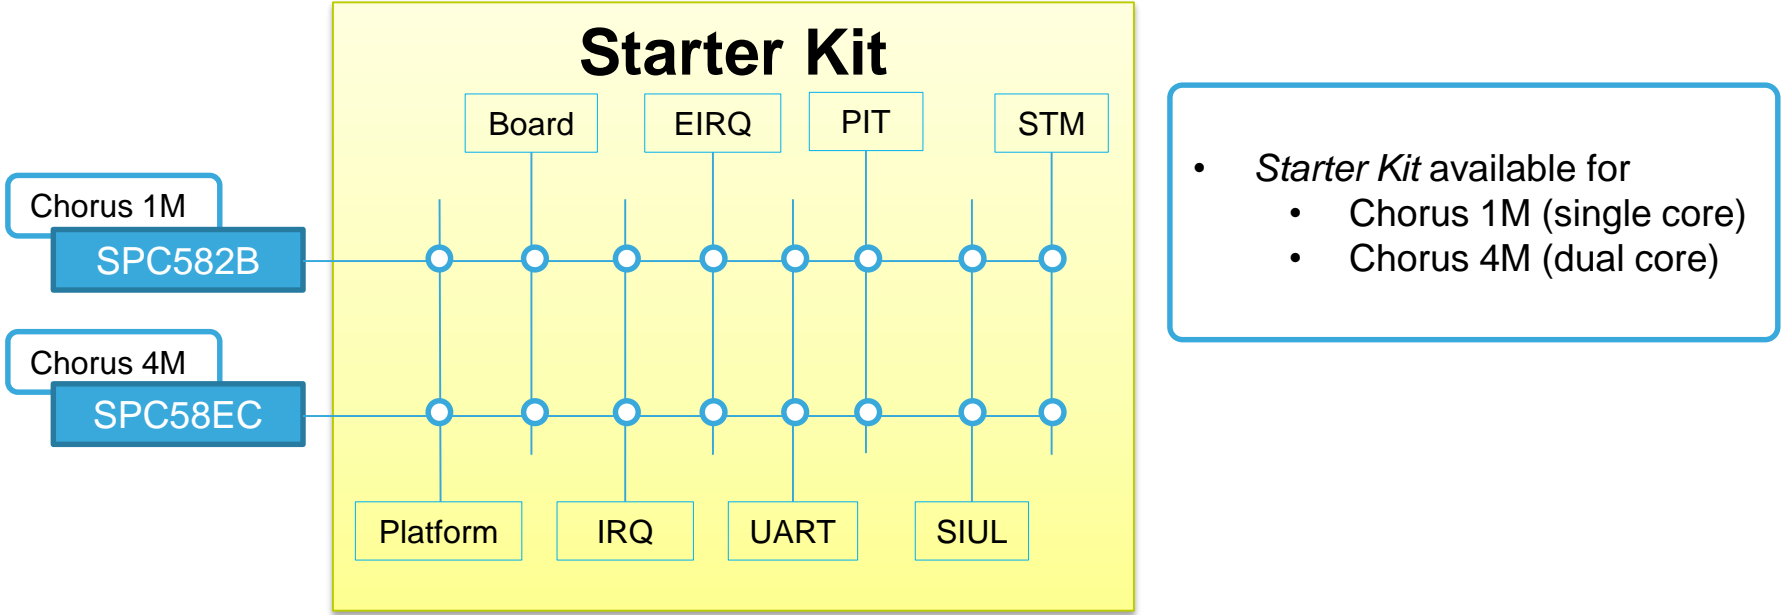

Evaluation systems

Wide offer of hardware tools
ST offers a comprehensive choice of hardware tools from starter kits to evaluation kits to emulation systems

Modular approach for maximum scalability
The hardware modular approach guarantee high flexibility in development and application scalability

The SPC5 kits are the reference system for the automotive family of microcontrollers.
From first evaluation to application specific development, SPC5 kits allow full access to CPU's signals and motherboard's peripherals such as CAN, SCI, LIN and Flex-Ray

**Easily prototype your application on device and system platforms**

Smart Driving

Promotion and Evaluation Boards

- Two level of boards to satisfy all needs
  - Premium Evaluation boards
    - Access all peripherals, change MCU using socket and mini-modules
    - Port for JTAG and Nexus trace debuggers
  - Discovery/Discovery+ Boards
    - IC soldered on PCB with customer option to change it
    - Embedded debugger
    - Legacy Automotive connector
    - Connectivity Ports (Can / LIN)
    - Arduino-Compatible (Pictus Discovery+ only)

Promote the solution enabling immediate user operation

Connect to other system in automotive environment

Debug your application

Connect extension modules with ST smart power devices

Connect ARDUINO World

life.augmented
SPC5 Discovery kits

An entry-level solution with integrated debugger to enable a quick evaluation of main functionalities at an affordable cost *

The expansion connector makes it easy to plug in application and extension modules for rapid prototyping, while Arduino-compatible connectors allow the use of a wide choice of specialized shields

Developers benefit from the fully customizable SPC5Studio development environment with its intuitive user interface

Evaluate SPC5 MCUs at a budget price

* Features depending from specific Discovery
Line	Part number	Description	Supported devices
SPC56 A line	SPC564A-DISP	Discovery Kit for the SPC56 A Line with SPC564A70L7.	SPC564A70L7
SPC56 B line	SPC560B-DIS	Discovery Kit for the SPC56 B Line with SPC560B54L5.	SPC560B54L5
SPC56 D line	SPC560D-DIS	Discovery Kit for the SPC56 D Line with SPC560D40L1.	SPC560D40L1

life.augmented

SPC5 Premium evaluation boards

With SPC5 Premium boards developers can quickly evaluate all the functionalities of SPC5 automotive MCUs.

Adapter boards are available for each specific device line and package granting full access to all of the CPU's signals and motherboard peripherals for advanced development.

Supported by both SPC5 Studio and 3rd party software tools

Modular approach saves development time and costs
Premium evaluation board features

- Modular evaluation system for the SPC5 microcontroller's families

- Single 12V external power supply

- Four on-board regulators

- 5.0 V, 3.3 V and 1.25 V switching regulators

- 5 V linear regulator for the ADC supplies and references

- Master power switch and regulator status LEDs

- Two 240-way high-density expansion connectors for MCU daughter cards

- All MCU signals readily accessible at a port-ordered group of 0.1" pitch headers

- RS232/SCI physical interface and standard DB9 female connector

- FlexRAY channels interface with a DB9 connector (for both transceivers) and alternative connectors

- LINFlexD interface with two different style connectors

- High speed CAN channels and two female standard DB9 connectors

- Ethernet interface with a standard RJ45 Ethernet connector

- Potentiometer for analog voltage input

- User switches and LED's freely configurable

SPC5 Emulation boards

**High speed solutions for tracing, monitoring and bypassing**

STMicroelectronics and third parties solutions enable full speed tracing, monitoring and calibration of SPC5 microcontrollers

A comprehensive set of emulation boards and accessories allows emulation of all SPC5 high-level devices

Memory/Debug Top Boards, Poly-Pod and interposers complete the offer
life.augmented
SPC56 Emulation Solution

- **Serial Calibration**

  - JTAG: using Debug Interface

  - CAN: Using CCP/XCP

  - Dual Port RAM for memory emulation

- **Parallel Calibration :Vertical**

  - Direct Access to ECU memory with parallel Address/Data bus

  - Dual Port RAM for memory emulation
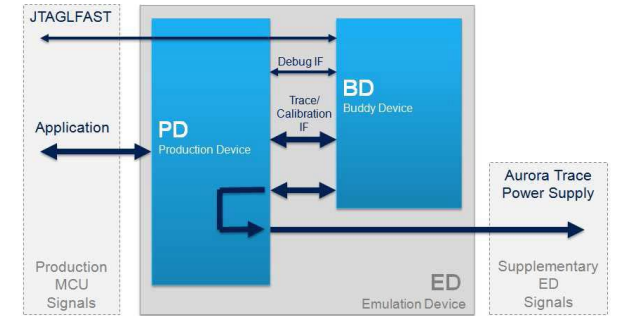

SPC56 Emulation boards

SPC56 family, A and M lines

Line	Device	Part number	Description
M line	SPC563M64L5	**SPC563M64AVB144**	VertiCal Base Board for M-Line target in LQFP144 package.

All lines	All devices	**POLYPOD-BGA324**	TQ-PolyPod for BGA324 targets.
	All devices	**POLYPOD-TQ144**	TQ-PolyPod for QFP144 targets.
	All devices	**POLYPOD-TQ176**	TQ-PolyPod for QFP176 targets.

SPC 57/58 Emulation boards

- Present a new strategy for debug and calibration operations.

- Emulation Board is for Emulation and Calibration purpose.

- The product is designed by using an Emulation Device (ED) to substitute the Production Device (PD) on an ECU version used during engine calibration.

- The buddy device integrates additional RAM, faster interfaces and improved debug features.

- The emulation/calibration board do not need external SRAM, since it is included in the Emulation Device.

- The K2 Emulation board is designed to Emulate both eTQFP176 and eTQFP144 production devices. The different footprint target will impact the choice of the adapter to buy.

- The Emulation Device in FQ216 package is mounted on board.

ST Flasher Tools

- Developed to manage the flash via SCI, CAN and K-line.
- The tool functionalities are:
  - Flash program
  - Flash Erase
  - Flash dump
  - Flash Verify
  - Flash blank check
- The top level diagram of the SPC5 Flash Programmer.

```

SPC5 Connect

- A programmable USB interface designed to connect a PC to development hardware via automotive communications channels such as CAN, SCI, LIN and K-Line.

- The included extension flat cable with the 14 pin header connector and the DB9 connector makes possible to easily connect a daughter board or wrapping board for a specific application.

- SPC5Connect can be used together with SPC5Flashprogrammer to realize the Serial boot from CAN interface.
3rd Party Development Tools Support

SPC58 Development Tools support

Device	HW	Status	Device	HW	Status
Eiger	**Samples**		**Chorus**	**Samples**	
SPC58xE	Lauterbach	Available	SPC58xG	Lauterbach	Available
SPC58xE	PLS	Available	SPC58xG	PLS	Available
SPC58xE	iSystem	Available	SPC58xG	iSystem	Available
SPC58xE	Wind River	Available	SPC58xG	Wind River	Available
SPC58xE	Green Hills	Available	SPC58xG	Green Hills	Available
SPC58xE	HighTec	Available	SPC58xG	HighTec	Available

Device	HW	Status	Device	HW	Status
Bernina	**Samples**		**Chorus**	**Samples**	
SPC58xN	Lauterbach	Available	SPC58xB/C	Lauterbach	Available
SPC58xN	PLS	Available	SPC58xB/C	PLS	Available
SPC58xN	iSystem	Available	SPC58xB/C	iSystem	Available
SPC58xN	Wind River	Available	SPC58xB/C	Wind River	Available
SPC58xN	Green Hills	Available	SPC58xB/C	Green Hills	Available
SPC58xN	HighTec	Available			

Above compilers and debuggers support all SPC56 and SPC57 and SPC58.

Ecosystem of Third Party partners

IDE/Compilers
- Green Hills MULTI
- Wind River Compiler
- HighTec GNU "C" Compiler

Debuggers/Emulators
- Lauterbach PowerTools
- PLS UDE/UADx
- iSystem ic3000/5000
- Entry level solutions from PLS, P&E and Keolabs

**Calibration tools**
- ETAS
- Vector
- dSPACE

Operating systems and software
- ElektroBit
- Arccore
- ETAS
- Vector
- KPIT
- i-Soft

Security Solution
- ARGUS
- ESCRYPT
