

ISP130301

High Performance Bluetooth V4.2 & ANT⁽¹⁾ Low Energy Module with MCU and Antenna

This tiny LGA module, 8 x 11 x 1.2 mm, is based on the nRF51 series Chip. Its powerful Cortex™ M0 CPU, flash and RAM memory combined with an optimized antenna offers the perfect solution for Bluetooth connectivity. The solution is best in class for RF performance and low power consumption. All chip digital and analogue interfaces are available and give optimum capabilities for sensor integration.

Key Features

- Single Mode BLE V4.2 Compliant
- (1) ANT+ protocol in option
- IPv6 Connectivity
- ECDH Encryption
- Based on Nordic Semiconductor nRF51
- 2.4GHz low energy RF Transceiver
- 32bit ARM Cortex M0 CPU
- 256 kB Flash
- 16 kB or 32 kB SRAM in option
- 30 GPIOs including 6 ADC inputs and / or 2 ADC reference
- Ultra Low Power Consumption
- Single 1.8 to 3.6 V supply
- Very small size 8.0 x 11.0 x 1.2 mm
- Temperature -40 to +85 °C
- Fully integrated RF matching and Antenna
- Integrated 16 MHz Clock
- Integrated 32.768 kHz Synchronization
- DC-DC loading circuit fully integrated

Applications

- Connected sensors for medical devices, healthcare, sport, fitness, industrial ...
- IoT applications, connected objects
- Wearable technology
- Home automation
- Beacons

Certifications

- Bluetooth SIG certified QDL listing
- Fully CE certified module
- Fully FCC certified module
- Fully IC certified module
- Fully IMOC certified module
- Fully TELEC certified module
- RoHS compliant

1. Block Diagram

This module is based on nRF51 Nordic Semiconductor 2.4GHz wireless System on Chip (SoC) integrating a 2.4 GHz transceiver, a 32-bit ARM Cortex™-M0 CPU, a flash memory, a RAM and analog and digital peripherals.

It can support Bluetooth® Low Energy and 2.4GHz proprietary ultra low-power wireless protocols, such as Gazell from Nordic Semiconductor. The ANT / ANT+™ protocol can be handled in option.

Fully qualified BLE stacks for nRF51 are implemented in the S100 series of SoftDevices which can be freely downloaded. ISP130301 can then be used in Central, Peripheral or both roles for BLE and for both ends of other proprietary protocols. nRF51 platform also provides extensive software support for ANT applications with S210 SoftDevices and dual ANT/BLE stack S310 SoftDevices.

Ultra low power consumption and advanced power management enables battery lifetimes up to several years on a coin cell battery. Even though its very small size 8 x 11 x 1.2 mm, the module integrates decoupling capacitors, 16 MHz and 32.768 kHz crystals, load capacitors, DC-DC converter, RF matching circuit and antenna in addition to the wireless SoC.

Only the addition of a suitable DC power source is necessary for BLE and/or ANT connectivity. Sensor applications require the further addition of appropriate sensors. The antenna was designed to be optimized with several standard ground plane sizes.

2. Specifications

The specifications of the module follow those of the nRF51. The following high level parameters are given for the module.

2.1. Absolute Maximum Ratings

Parameter	Min	Typ	Max	Unit
Supply Voltage respect to ground - VCC	-0.3		3.9	V
IO Pin Voltage	-0.3		VCC + 0.3	V
Storage Temperature	-40		+125	°C
Moisture Sensitivity Level			5	-
ESD Human Body Model			4000	V
ESD Charged Device Model			500	V
Flash Endurance			20000	cycles

2.2. Operating Conditions

Parameter	Min	Typ	Max	Unit
Operating Supply Voltage, internal LDO setup	1.8 ⁽¹⁾ 1.9 ⁽²⁾	3.0	3.6	V
Operating Supply Voltage, DCDC converter setup	2.1	3.0	3.6	V
Extended Industrial Operating Temperature Range	-40	+25	+85	°C

(1) Minimum Supply Voltage Specification for Standard Operating Temperature Range -25°C to +75°C only

(2) Minimum Supply Voltage Specification for Extended Industrial Operating Temperature Range -40°C to +85°C

2.3. Power Consumption

Parameter	Min	Typ	Max	Unit
Peak current, Receiver active (supply at 2.1V)		12.6		mA
Peak current, Transmitter active +4 dBm Output Power		16		mA
Peak current, Transmitter active 0 dBm Output Power		10.5		mA
Current drain, Connection-less state, no RAM retention		0.6		μA
Current drain, Between connection events		2.6		μA

2.4. Clock Sources

Parameter	Min	Typ	Max	Unit
Internal High Frequency Clock for RF Stability: 16 MHz Crystal Frequency Tolerance ⁽¹⁾			+/- 40	ppm
Internal Low Frequency Clock for BLE Synchronization: 32.768 kHz Crystal Frequency Tolerance ⁽¹⁾			+/- 40	ppm
Internal Low Frequency Clock for BLE Synchronization: RC Oscillator ⁽²⁾			+/- 250	ppm
RF Frequency tolerance: For BLE operation Channels 0 to 39			+/- 40	ppm

(1) including initial tolerance, drift, aging, and frequency pulling

(2) with calibration interval of 4 sec

2.5. Radio Specifications

Parameter	Min	Typ	Max	Unit
Frequency Range	2402		2480	Mhz
Channel 0 to 39 Spacing		2		Mhz
Output Power Channels 0 to 39	-20		+4	dBm
Rx sensitivity Level for BER <0,1% ideal Tx	-93			dBm
Antenna Gain		0.6		dBi
EIRP	-19.4		4.6	dBm
Range Open field @1m height		100		m
Data Rate	250 / 1000 / 2000			kbps

Typical Antenna Return Loss

Module mounted on a USB dongle ground plane

Radiation Pattern in 3 planes

Module mounted on a USB dongle ground plane

Phi (0.000 to 360.000)

3. Pin Description

The module uses an LGA format with a double row of pads on a 0.65 mm pitch. The pad layout follows the QFN Jedec standard for 2 row LGA parts. The NC pads are to be connected to isolated metal pads on the application PCB for mechanical stability and reliability (drop test).

Pin	Name	Pin function	Description
1	P0_07	Digital I/O	General purpose I/O pin
2	NC	Not Connected	Isolated pad on application PCB for mechanical stability
3	P0_09	Digital I/O	General purpose I/O pin
4	NC	Not Connected	Isolated pad on application PCB for mechanical stability
5	P0_13	Digital I/O	General purpose I/O pin
6	NC	Not Connected	Isolated pad on application PCB for mechanical stability
7	P0_19	Digital I/O	General purpose I/O pin
8	NC	Not Connected	Isolated pad on application PCB for mechanical stability
9	P0_17	Digital I/O	General purpose I/O pin
10	NC	Not Connected	Isolated pad on application PCB for mechanical stability
11	P0_20	Digital I/O	General purpose I/O pin
12	VSS	Ground	Should be connected to ground plane on application PCB
13	NC	Not Connected	Isolated pad on application PCB for mechanical stability
14	VSS	Ground	Should be connected to ground plane on application PCB
15	NC	Not Connected	Isolated pad on application PCB for mechanical stability
16	VSS	Ground	Should be connected to ground plane on application PCB
17	NC	Not Connected	Isolated pad on application PCB for mechanical stability
18	VSS	Ground	Should be connected to ground plane on application PCB
19	NC	Not Connected	Isolated pad on application PCB for mechanical stability
20	VSS	Ground	Should be connected to ground plane on application PCB
21	NC	Not Connected	Isolated pad on application PCB for mechanical stability
22	VSS	Ground	Should be connected to ground plane on application PCB
23	VSS	Ground	Should be connected to ground plane on application PCB
24	OUT_MOD	Antenna I/O	This pin is the RF I/O pin of the BLE module It should be connected to Pin 26 OUT_ANT for normal operation
25	VDD_PA	PA supply	PA supply indicates Transmit mode (Active High) Warning: Leave Floating
26	OUT_ANT	Antenna I/O	This pin is connected to the internal antenna It should be connected to Pin 24 OUT_MOD for normal operation
27	VSS	Ground	Should be connected to ground plane on application PCB
28	VSS	Ground	Should be connected to ground plane on application PCB
29	VCC_nRF	Power	Power supply (1.8 – 3.6V)
30	VSS	Ground	Should be connected to ground plane on application PCB
31	SWDCLK	Digital Output	HW debug and flash programming I/O
32	P0_18	Digital I/O	General purpose I/O pin
33	SWDIO-nRESET	Digital I/O	System reset (active low). Also HW debug and flash programming I/O
34	P0_16	Digital I/O	General purpose I/O pin
35	P0_15	Digital I/O	General purpose I/O pin
36	P0_14	Digital I/O	General purpose I/O pin
37	P0_12	Digital I/O	General purpose I/O pin
38	P0_10	Digital I/O	General purpose I/O pin

39	P0_11	Digital I/O	General purpose I/O pin
40	P0_05	Digital I/O	General purpose I/O pin
	AIN6	Analog input	ADC input 6
41	P0_06	Digital I/O	General purpose I/O pin
	AIN7	Analog input	ADC input 7
	AREF1	Analog input	ADC Reference voltage
42	P0_03	Digital I/O	General purpose I/O pin
	AIN4	Analog input	ADC input 4
43	P0_04	Digital I/O	General purpose I/O pin
	AIN5	Analog input	ADC input 5
44	P0_01	Digital I/O	General purpose I/O pin
	AIN2	Analog input	ADC input 2
45	P0_31	Digital I/O	General purpose I/O pin
46	P0_02	Digital I/O	General purpose I/O pin
	AIN3	Analog input	ADC input 3
47	P0_30	Digital I/O	General purpose I/O pin
48	P0_00	Digital I/O	General purpose I/O pin
	AREF0	Analog input	ADC Reference voltage
49	P0_29	Digital I/O	General purpose I/O pin
50	P0_28	Digital I/O	General purpose I/O pin
51	P0_24	Digital I/O	General purpose I/O pin
52	P0_23	Digital I/O	General purpose I/O pin
53	P0_21	Digital I/O	General purpose I/O pin
54	P0_22	Digital I/O	General purpose I/O pin
55	P0_25	Digital I/O	General purpose I/O pin
56	P0_08	Digital I/O	General purpose I/O pin
57	GND_EP	Ground	Should be connected to ground plane on application PCB

4. Mechanical Outlines

4.1. Mechanical Dimensions

Dimensional drawing for 8 x 11 x 1.2 mm, 57-Pad LGA Package

4.2. SMT Assembly Guidelines

Recommended PCB Land Pattern and Solder Mask layout. Complete information is available on request.

4.3. Antenna Keep-Out Zone

For optimal antenna performance, it is recommended to respect a metal exclusion zone to the edge of the board: no metal, no traces and no components on any application PCB layer except mechanical LGA pads.

5. Product Development Tools

5.1. Hardware

In order to assist clients in developing their Bluetooth Smart solutions based on the ISP130301, Insight SiP offers a Sensor Development Kit containing:

- One Interface Board
- J-Link Lite CortexM-9 JTAG/SWD Emulator
- One Test Board
- One Sensors Board
- A Development Dongle
- 5 ISP130301 module samples
- Cables, power supply and coin battery holder

Using this development kit, product developers can use a working solution as starting point to develop their own products. Time to market is saved by avoiding starting from a blank sheet of paper. In addition, there may be some applications that use the hardware as is.

Please refer to the documentation for more information:

http://www.insightsip.com/fichiers_insightsip/pdf/ble/ISP130301/isp_ble_PS130301_DK.pdf

http://www.insightsip.com/fichiers_insightsip/pdf/ble/ISP130301/isp_ble_AN140101.pdf

5.2. Firmware

ISP130301 supports Bluetooth Low Energy protocol stacks as well as 2.4 GHz protocol stacks, including Gazell, both available as downloads. If ANT protocol is selected as an option, specific ANT protocol stacks are also available as download at www.nordicsemi.com.

- ✚ The S110 SoftDevice is a Bluetooth Low Energy peripheral / broadcaster protocol stack solution. It integrates a Bluetooth Smart controller and host, and provides a full and flexible API for building Bluetooth Smart solutions:
- ✚ The S120 SoftDevice is a Bluetooth low energy central protocol stack solution supporting up to eight simultaneous Central role connections. It integrates a Bluetooth controller and host, and provides a full and flexible API for building Bluetooth Smart solutions.
- ✚ The S130 SoftDevice is a Bluetooth low energy concurrent multi-link protocol stack solution supporting simultaneous Central / Peripheral / Broadcaster / Observer role connections. It integrates a Bluetooth Smart controller and host, and provides a full and flexible API for building Bluetooth Smart solutions.
- ✚ The S210 SoftDevice is an ANT protocol stack solution that provides a full, flexible application programming interface (API) for building ANT solutions for Nordic Semiconductor nRF51 ICs. S210 SoftDevice reduces the need for a secondary application host MCU to ANT solutions.

The S310 SoftDevice is an ANT and Bluetooth low energy peripheral controller and hosts a multiprotocol stack that provides a full, flexible application programming interface (API) for building concurrent ANT and Bluetooth Smart solutions for the nRF51422 IC. The S310 SoftDevice reduces the need for a secondary application host MCU as well as the need for an added device to support concurrent multiprotocol.

5.3. Development Tools

The following development tools and software are recommended for using and testing ISP130301 module:

-  Nordic Semiconductor nRFgo Studio:
Downloadable after registering at www.nordicsemi.com.
-  Nordic Semiconductor Master Control Panel:
Downloadable after registering at www.nordicsemi.com.
-  Keil MDK-ARM Lite:
Downloadable from <https://www.keil.com/demo/eval/arm.htm>.
-  Segger J-Link Lite:
Downloadable from <http://www.segger.com/jlink-software.html>.
-  nRF51 Software Development Kit (SDK):
nRF51 SDK can be downloaded after registering at www.nordicsemi.com. It contains example of source codes applications (C language):
 - Precompiled HEX files
 - Source code
 - Keil ARM project files
 - IAR project files
 - GCC project files

6. Reference Designs

6.1. Sensor Board Design

ISP131001 is an autonomous low-power device for wireless acceleration, temperature and barometer detection and transmission. The complete device makes use of Insight SiP ISP130301 BLE module together with low power 3-axis accelerometer and temperature/barometer sensors connected to a primary button cell battery CR2032.

The Freescale FXOS8700CQ 3-axis linear accelerometer and 3-axis magnetometer is used to detect acceleration and is combined with ST Micro LPS331AP temperature and barometer sensor. A Rohm SML-P11MTT86 mini-LED is also part of the board and is available to be controlled by software. Data are transmitted via GPIO processor port.

6.2. Beacon Design

ISP140501 is an autonomous low-power device for wireless detection and transmission. The complete device makes use of Insight SiP ISP130301 BLE module together with low power host processor and small primary button cell battery CR2450. It has been developed to explore the full range of development possibilities for beacons using Bluetooth Smart technology. They allow indoor positioning, letting your phone know that you are in range of a beacon. As the “beacon” name suggests, they transmit packets of data in regular intervals, and this data can be then picked up by devices like smartphones.

The two buttons can be programmed to enable easy switching between modes and/or functionality. As well an RGB-LED can be configured to indicate different events.

7. Packaging & Ordering information

7.1. Marking

I	S	P	1	3	0	3	0	1
T	T		Y	Y	W	W	R	

ISP130301	Part Number
TT	2 letters Module Type (see section 7.5)
YY	Two digits year number
WW	Two digits week number
R	1 letter Hardware revision

7.2. Prototype Packaging

For engineering samples and prototype quantities up to 99 units, deliveries are provided in thermoformed trays or cut tapes. Please order with "ST" code packaging suffix.

These parts must be backed prior to assembly (see section 8.2)

7.3. Jedec Trays

For higher quantities and volume production, ISP130301 are available in Jedec trays. They are delivered in sealed pack with desiccant pack and humidity sensors. These Jedec trays are also suitable for further baking. Please see section 8.2 for more information on moisture sensitivity. Please order with "JT" code packaging suffix.

Refer to tray sizes and module positioning below. Complete information on Jedec trays is available on request.

7.4. Tape and Reel

ISP130301 are also available in Tape & Reel. They are delivered in sealed pack with desiccant pack and humidity sensors. Reels are proposed in standard quantities of 500 units (180mm / 7" reel) or 2000 units (330mm / 13" reel) only. Please order with "RS" code packaging suffix for 500-unit reels and "R2" for 2000-unit reels.

Please refer to tape size below. Complete information is available on request.

7.5. Ordering Information

8. Storage & Soldering information

8.1. Storage and Handling

- ✚ Keep this product away from other high frequency devices which may interfere with operation such as other transmitters and devices generating high frequencies.
- ✚ Do not expose the module to the following conditions:
 - Corrosive gasses such as Cl₂, H₂S, NH₃, SO₂, or NO_x
 - Extreme humidity or salty air
 - Prolonged exposure to direct Sunlight
 - Temperatures beyond those specified for storage
- ✚ Do not apply mechanical stress
- ✚ Do not drop or shock the module
- ✚ Avoid static electricity, ESD and high voltage as these may damage the module

8.2. Moisture Sensitivity

All plastic packages absorb moisture. During typical solder reflow operations when SMDs are mounted onto a PCB, the entire PCB and device population are exposed to a rapid change in ambient temperature. Any absorbed moisture is quickly turned into superheated steam. This sudden change in vapor pressure can cause the package to swell. If the pressure exerted exceeds the flexural strength of the plastic mold compound, then it is possible to crack the package. Even if the package does not crack, interfacial delamination can occur.

Since the device package is sensitive to moisture absorption, it is recommended to bake the product before assembly. The baking process for dry packing is 24 hours at 125°C.

ISP130301 has been tested MSL-5 according to standards. After baking, modules can be exposed to ambient room conditions (approximately 30 °C/60%RH) during 48 hours before assembly on the PCB.

8.3. Soldering information

Recommendation for RoHS reflow process is according to Jedec J-STD-020 and 033 standard profiles.

Preheat/Soak	
Temperature Min (T_{smin})	150 °C
Temperature Max (T_{smax})	200 °C
Time (t_s) from (T_{smin} to T_{smax})	60-120 sec
Ramp-up rate (T_L to T_p)	3 °C/sec max
Liquidous temperature (T_L)	217 °C
Time (t_L) maintained above T_L	60-150 sec

Peak package body temperature (T_p)	260°C (+0/-5°C)
Classification Temperature (T_c)	260 °C
Time (t_p) maintained above $T_c - 5^\circ\text{C}$	30 sec
Ramp-down rate (T_p to T_L)	6 °C/sec max
Time 25 °C to peak temperature	8 mn max

9. Quality & User information

9.1. Certifications

- FCC Identifier 2AAQS-ISP130301 – Certificate N° 142180643/AA/00
- CE: Complies with 1999/5/EC, EN300328 V1.8.1, Statement N° 142140199/AA/00
- IC Certification N° 11306A-ISP130301 – Telefication N° 142170180/AA/00
- TELEC certification N° 001 – A03467
- Bluetooth SIG certified N° D024444
- RoHS compliant

9.2. USA – User information

This intends to inform how to specify the FCC ID of our module “ISP130301” on the product. Based on the Public Notice from FCC, the host device should have a label which indicates that it contains our module. The label should use wording such as:

“Contains FCC ID: 2AAQS-ISP130301”

Any similar wording that expresses the same meaning may be used.

The label of the host device should also include the below FCC Statement. When it is not possible, this information should be included in the User Manual of the host device:

*“This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions.
(1) This device may not cause harmful interference
(2) This device must accept any interference received, including interference that may cause undesired operation.
Caution: Any Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.”*

9.3. Canada – User information

This intends to inform how to specify the IC ID of our module “ISP130301” on the product. According to Canadian standards “RSS-210” and “RSS-Gen”, the host device should have a label which indicates that it contains our module. The label should use wording such as:

“Contains IC: 11306A-ISP130301”

Any similar wording that expresses the same meaning may be used.

The label of the host device should also include the below IC Statement. When it is not possible, this information should be included in the User Manual of the host device:

"This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device."

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement."

9.4. Discontinuity

Normally a product will continue to be manufactured as long as all of the following are true:

- The manufacturing method is still available.
- There are no replacement products.
- There is demand for it in the market.

In case of obsolescence, Insight SiP will follow Jedec Standard JSD-48. A Product Discontinuation Notice (PDN) will be sent to all distributors and made available on our website. After this, the procedure goes as follows:

- Last Order Date will be 6 months after the PDN was published.
- Last Shipment Date will be 6 months after Last Order Date, i.e. 12 months after PDN.

9.5. Disclaimer

Insight SiP's products are designed and manufactured for general consumer applications, so testing and use of the product shall be conducted at customer's own risk and responsibility. Please conduct validation and verification and sufficient reliability evaluation of the products in actual condition of mounting and operating environment before commercial shipment of the equipment. Please also pay attention (i) to apply soldering method that don't deteriorate reliability, (ii) to minimize any mechanical vibration, shock, exposure to any static electricity, (iii) not to overstress the product during and after the soldering process.

The products are not designed for use in any application which requires especially high reliability where malfunction of these products can reasonably be expected to result in personal injury or damage to the third party's life, body or property, including and not limited to (i) aircraft equipment, (ii) aerospace equipment, (iii) undersea equipment, (iv) power plant control equipment, (v) medical equipment, (vi) transportation equipment, (vii) traffic signal equipment, (viii) disaster prevention / crime prevention equipment.

The only warranty that Insight SiP provides regarding the products is its conformance to specifications provided in datasheets. Insight SiP hereby disclaims all other warranties regarding the products, express or implied, including without limitation any warranty of fitness for a particular purpose, that they are defect-free, or against infringement of intellectual property rights. Insight SiP customers agree to indemnify and defend Insight SiP against all claims, damages, costs and expenses that may be incurred, including without any limitation, attorney fees and costs, due to the use of products.
