All specifications may be changed without notice.
Please check with our sales representatives or product engineers before ordering.

1. Scope

These specifications are applied to Polymer Aluminum Electrolytic Capacitor for electronic equipment use.
Please contact us beforehand when you use it besides this use.

2. Part Number Description

- ① Series : ECAS
- ② Dimensions : See 3.1
- ③ Rated Voltage : See 3.2
- ④ Capacitance : See 3.3
- ⑤ Capacitance Tolerance : See 3.4
- ⑥ ESR : See 3.5
- ⑦ Packing : See 3.6
- ⑧ Individual Specification Code : Murata management Code

3. Descriptions

3.1 Dimensions (mm)

| Case Code | L | W | T | W1 | S |
|-----------|---------|---------|---------|---------|---------|
| D3 | 7.3±0.3 | 4.3±0.2 | 1.4±0.1 | 2.4±0.2 | 1.3±0.2 |
| D4 | 7.3±0.3 | 4.3±0.2 | 1.9±0.1 | 2.4±0.2 | 1.3±0.2 |
| D6 | 7.3±0.3 | 4.3±0.2 | 2.8±0.3 | 2.4±0.2 | 1.3±0.2 |

3.2 Rated Voltage

| Code | Voltage |
|------|---------|
| 0D | 2V |
| 0E | 2.5V |
| 0J | 6.3V |
| 1A | 10V |
| 1C | 16V |
| 1D | 20V |
| 1E | 25V |

3.3 Capacitance

This code is shown by three-digit numeric. The unit is pico-farad (pF). The first and the second figures show the significant digits of the nominal capacitance, and the third figure shows the number of "0" following the significant digit.

Ex.)

| Code | Capacitance |
|------|-------------|
| 476 | 47 μ F |
| 107 | 100 μ F |
| 227 | 220 μ F |
| 477 | 470 μ F |

3.4 Capacitance Tolerance

| Code | Tolerance |
|------|------------|
| M | $\pm 20\%$ |

3.5 ESR

This code is shown by three-digit alphanumeric. The unit is milli-ohm (m Ω). If there is a decimal point, it is expressed by the capital letter "R".

Ex.)

| Code | ESR |
|------|---------------|
| 4R5 | 4.5m Ω |
| 009 | 9m Ω |
| 010 | 10m Ω |

3.6 Packing

| Code | Specification |
|------|--------------------------------------|
| K | $\Phi 330$ mm plastic taping packing |

3.7 Individual Specification Code

Expressed by two figures.

The measurement condition in No.2 to 4 applies to No.8 to 12.

7. Packaging

7.1 Carrier Tape Configuration and Dimension

| Type | Cavity Size (mm) | | | | Minimum Qty. (pcs.) |
|--------|------------------|------|------|------|---------------------|
| | A* | B* | C* | D* | |
| D3, D4 | 4.60 | 7.65 | 2.16 | 0.23 | 3,000 |
| D6 | 4.60 | 7.65 | 3.20 | 0.27 | 2,500 |

* Nominal values

7.2 Tape Packaging

Capacitors will be inserted in embossed carrier tape that will be sealed with cover tape as described below. No more than half of a sprocket hole will be covered by cover tape.

7.3 Taping Leader

Tape has a leader and a trailer as described below.

7.4 Cover Tape Peel Strength

Cover tape peel strength required to be within the range of 0.1-0.8N when tested as below .

7.5 Empty Cavities of Carrier Tape Section

Empty cavities of filled section must be lower than 0.1% or 1pc of the total of reel quantity and sequential empty cavities are not allowed. Devices placed in one reel must satisfy the specified reel quantity.

7.6 Reel Configuration and Dimension

Tape with capacitors is wound in a reel as described below.

| Reel Size | Tape Width | A | B | W | W1 |
|-----------|------------|---------------|---------------|--------------|--------------|
| Φ330 | 12 | 330.0 ±2.0 | 100.0 ±1.0 | 17.4 ±1.5 | 13.4 ±1.5 |

(mm)

7.7 Labels on Reel

Shipping Label that show the customer parts number, our parts number, our company name, inspection number and quantity, will be put in outside of reel.

Please note the position of sipping label when feeding a tape.

7.8 Moisture Proof Aluminum Laminated Bag Packaging

A reel of the products is packaged in a moisture proof aluminum laminated bag and labels are put on the bag as shown below. One desiccant and a humidity indicator are put on the backside of the reel before slightly drawing the vacuum and sealing the bag.

Note) The size of the Moisture Proof Aluminum Laminated Bag is a rough value.

7.9 Cardboard Box Packaging

Moisture proof aluminum laminated bags of products are packaged in a cardboard box.

8. Quality Assurance

<1> Murata's responsibility for the quality of this product shall be limited to those specified in this document.

<2> It is a customer's responsibility to judge fitness of this product for assembly process, end use and operating environment.

9. Caution for Use

Caution

9.1 Limitation of Applications

The products listed in the Product Specification (hereinafter the product(s) is called as the "Product(s)") are designed and manufactured for applications specified in the Product Specification. (hereinafter called as the "Specific Application").

We shall not warrant anything in connection with the Products including fitness, performance, adequateness, safety, or quality, in the case of applications listed in from (1) to (11) written at the end of this precautions, which may generally require high performance, function, quality, management of production or safety. Therefore, the Product shall be applied in compliance with the specific application.

WE DISCLAIM ANY LOSS AND DAMAGES ARISING FROM OR IN CONNECTION WITH THE PRODUCTS INCLUDING BUT NOT LIMITED TO THE CASE SUCH LOSS AND DAMAGES CAUSED BY THE UNEXPECTED ACCIDENT, IN EVENT THAT (i) THE PRODUCT IS APPLIED FOR THE PURPOSE WHICH IS NOT SPECIFIED AS THE SPECIFIC APPLICATION FOR THE PRODUCT, AND/OR (ii) THE PRODUCT IS APPLIED FOR ANY FOLLOWING APPLICATION PURPOSES FROM (1) TO (11) (EXCEPT THAT SUCH APPLICATION PURPOSE IS UNAMBIGUOUSLY SPECIFIED AS SPECIFIC APPLICATION FOR THE PRODUCT IN OUR CATALOG SPECIFICATION FORMS, DATASHEETS, OR OTHER DOCUMENTS OFFICIALLY ISSUED BY US*).

(1) Aircraft equipment

(2) Aerospace equipment

(3) Undersea equipment

(4) Power plant control equipment

(5) Medical equipment

(6) Transportation equipment

(7) Traffic control equipment

(8) Disaster prevention/security equipment

(9) Industrial data-processing equipment

(10) Combustion/explosion control equipment

(11) Equipment with complexity and/or required reliability equivalent to the applications listed in the above.

For exploring information of the Products which will be compatible with the particular purpose other than those specified in the Product Specification, please contact our sales offices, distribution agents, or trading companies with which you make a deal, or via our web contact form.

Contact form: <https://www.murata.com/contactform>

*We may design and manufacture particular Products for applications listed in (1) to (11). Provided that, in such case we shall unambiguously specify such Specific Application in the Product Specification without any exception. Therefore, any other documents and/or performances, whether exist or non-exist, shall not be deemed as the evidence to imply that we accept the applications listed in (1) to (11).

Caution

9.2 Storage Condition

<1> Term of warranty for this product is two years after packaging in a moisture-proof bag, under the conditions below with sealed packaging.

Recommended storage environment Room temperature: 5-30 degree

Humidity: no more than 60%RH

<2> Polymer aluminum electrolytic capacitors should not be stored in an atmosphere consisting of corrosive gas(e.g. hydrogen sulfide, sulfur dioxide, chlorine, ammonia gas, etc.).

<3> Polymer aluminum electrolytic capacitors should be stored in a dry atmosphere, avoiding direct sunlight and condensation. If capacitors are kept at a higher humidity, the following problems may occur:

① Leakage current will increase at the beginning of use and damage the circuit.

② Moisture absorbed in a resin will evaporate and expand with heat of mounting and damage the mold resin.

<4> Please confirm a dry state with a humidity indicator card after open immediately. If 20% indication was in a pink state after opened, it is recommended to bake under the conditions below.

<5> The capacitors should be kept dry using desiccators or any other methods after unsealing the moisture-proof packaging. If more than one week has passed under the recommended storage environment specified above after unsealing the packaging, it is recommended to bake under the conditions below.

Recommended baking conditions Temperature: 60(+0, -5) degree C

Time: 168 hours

<6> This product meets MSL-3.

Caution

9.3 Cautions for Use

<1> Prohibited Circuits for use

Do not use the capacitor with the following circuit.

- ① Time-constant circuit
- ② Coupling circuits
- ③ 2 or more capacitors connected serially
- ④ Circuit which are greatly affected by leakage current

<2> Polarity

Polymer aluminum electrolytic capacitor is polarized. Please not to reverse the polarity when using. If reverse voltage is applied even momentary, it may damage the oxide film and the capacitor itself. Please verify the orientation of the capacitor before use in accordance with the drawing of "Markings" in Item 5.

<3> Operating Voltage

When DC-rated capacitors are to be used in AC or ripple current circuits, be sure to maintain the V_{o-p} value of the applied voltage or the V_{o-p} which contains DC bias within the rated voltage range. When the voltage is applied to the circuit, starting or stopping may generate irregular voltage for a transit period because of resonance or switching. Be sure to use a capacitor with a rated voltage range that includes these irregular voltages.

<4> Inrush Current

Extreme inrush current may cause short circuit or leakage current increase. If the inrush current exceeds 20A, adding protection circuit is recommended.

<5> Allowable Ripple Current

Please not to apply ripple current exceeding the allowable value specified in the standards in Item 4.1. If excessive current is applied, it may generate heat and the heat may damage the capacitor. The sum of DC voltage and the peak AC voltage shall not exceed the rated voltage. The sum of the DC voltage and the peak AC voltage shall not allow a voltage reversal.

<6> Operating Temperature

The operating temperature limit depends on the capacitor.

- ① Do not apply temperature exceeding the upper operating temperature. It is necessary to select a capacitor with a suitable rated temperature that will cover the operating temperature range. Also it is necessary to consider the temperature distribution in equipment and the seasonal temperature variable factor.
- ② Consider the self-heating of the capacitor. The surface temperature of the capacitor shall be the upper operating temperature or less when including the self-heating factors.

<7>Reflow Soldering

- ① Please not to apply excessive force to the capacitor during insertion as well as after soldering. The excessive force may result in damage to electrode terminals and/or degradation of electrical performance.
- ② Resistance testing to reflow soldering was conducted in accordance with the reflow profile described in Figure 1. If this profile is adopted, reflow soldering can be repeated no more than two times.

< Figure 1. > Our Recommended Reflow Profile

Peak temp.: 260°C max.

Peak temp.: 245°C max.

- ③ Please refer to figure below for designing land pattern.

< 8 > Operating environment

Confirm the environment in which the equipment will operate is under the specified conditions. Do not use the equipment under the following environments.

- ① Being splattered with water or oil.
- ② Being exposed to direct sunlight.
- ③ Being exposed to Ozone, ultraviolet rays or radiation.
- ④ Being exposed to toxic gas (e.g. hydrogen sulfide, sulfur dioxide, chlorine, ammoniagas, etc.)
- ⑤ Being exposed to excessive vibrations or mechanical shocks.
- ⑥ Being exposed to condensable environments.

< 9 > Disposal

Polymer aluminum electrolytic capacitors should be disposed of as industrial waste in accordance with laws.

10. Request

- ① When using the product, please be sure to evaluate it in the condition of being mounted on your product.
- ② Please do not use this product deviating from the description in this delivery specification.
- ③ We believe that it is not appropriate to include contractual matters related to transactions in specifications, drawings, and other technical documents. Therefore, if the technical documents prepared by your company contain any statement regarding quality assurance, product liability, industrial property rights, export control, etc., such statement shall be deemed invalid. We would like to ask you to agree to these matters in a separate basic transaction agreement.
