For new design applications, Glenair lists recommended material and plating codes on the how-to-order pages for each connector backshell series. Additional material and plating types, however, are available. Glenair can support every required material and plating type necessary to ensure compatibility with customer connectors, shielding, and hardware. Consult this connector accessory material and finish master table and/or the factory for non-standard, legacy, or unusual plating requirements.

Go to 3dparts.glenair.com for 3D part models in all popular CAD formats for the complete range of Glenair backshells and connector accessories.

Hand Tool for Band Installation

Glenair Band-Master ATS tools are equipped with a built-in counter to ensure required recalibration is performed in accordance with military and commercial aerospace requirements.

High Volume Pneumatic Tool

Terminate cable braid shield to adapter with stainless steel **Band-Master ATS®** bands. Install band with hand tool or bench-mounted pneumatic tool. Bands are available in three widths: **Standard** (.24 inch), **Micro** (.12 inch) and **Nano** (.075 inch). **Slim Standard** and **Micro Slim** bands have reduced thickness for weight reduction. Hardened steel **Micro-Max** bands have 60% more tensile strength than standard Micro bands. Available pre-coiled, bands are 304 series stainless steel, passivated.

Band Straps and Tools

Hand Banding Tools and Straps

Standard Banding Tool 601-100

Band-Master ATS® Standard Tool Designed for .240" width clamping bands in a tension range from 100 to 180 lbs. Calibrate at 150 lbs. $\pm$ 5 lbs. for most shield terminations.

Slim Standard Banding Tool 601-109

Band-Master ATS® Slim Standard Tool For use with slim standard pre-coiled .240" wide clamping bands. Tension range is approximately 30 to 80 lbs. Calibrate at 100 lbs. $\pm$ 3 lbs of linear pull.

Micro Banding Tool 601-101

Band-Master ATS® Micro Tool Designed for Micro .120" width clamping bands in a tension range from 50 to 85 lbs. Calibrate at 80 lbs $\pm$ 5 lbs. for most shield terminations.

Micro Slim Banding Tool 601-122

Band-Master ATS® Micro Slim Tool Designed for Micro Slim .120" width clamping bands in a tension range from 60 to 90 lbs. Calibrate at 82 lbs $\pm$ 3 lbs. for most terminations.

Nano Banding Tool 601-108

Band-Master ATS® Nano Tool Designed for us with Nano .075" width clamping bands in a tension range from 25 to 90 lbs. Calibrate at 50 lbs. $\pm$ 3 lbs. for most shield terminations.

Band-Master ATS® High-Tension Micro-Max Banding Tool

The 601-129 Band-Master ATS® Micro-Max with Counter for use with high-tension, low-resistivity Micro-Max Bands

Designed for use with high-tension Micro-Max .120" width clamping bands. Micro-Max is designed for shield termination requirements to a higher tension range from 100-180 lbs. resulting in lower-resistivity shield termination. Calibrate at 132 $\pm$ 3 lbs. for most shield terminations. Tool and Band should never be lubricated.

M24308 TYPE
FOR INDUSTRY-
STANDARD AND
GLENAIR SERIES 28
HIPER-D

Precision-machined
D-Sub backshells improve
shielding and environmental
performance of
MIL-DTL-24308 connectors

This catalog section includes
backshells for both standard M24308
connectors and Glenair Series 28
HiPer-D

Industry-standard M24308 D-Sub connectors are notoriously poor performers in terms of resistance to electromagnetic interference, environmental leakage, and overall mechanical durability. Glenair series backshells for D-Sub connectors are designed to markedly improve the performance of stamped-and-formed D-Subs through the use of fully-shrouded backshell enclosures, robust environmental seals, and durable machined or injection-molded construction. Also in this section, Glenair Series 28 HiPer-D connector backshells are built to advanced-performance standards in accordance with the performance benchmarks of this better-than-QPL D-Sub interconnect.

Glenair Signature Series M24308 Backshells

All Series 55 EMI backshells meet or exceed the shielding requirements of MIL-STD-461 (TEMPEST) as well as FCC Part 15 Subpart J on RS 232, RS 449 and similar installations.

289-003, 289-004, 289-019

Protective Cover

289-003, 289-004, 289-019

This accessory fits D-Subminiature M24308 and Series 28 HiPer-D connectors.

Protective cover fits Glenair Series 28 HiPer-D connectors and MIL-DTL-24308 connectors. Socket connector cover fits over connector shell and has fluorosilicone gasket. Pin connector cover fits inside connector shell. Socket connector cover has optional ground springs for EMI protection. Attach to panel with optional lanyard. Aluminum or stainless steel. Stainless steel screwlocks. Socket cover has nickel-plated copper alloy ground springs and fluorosilicone gasket.

Protective Cover, Panel Mount

500-008

This accessory fits D-Subminiature M24308 and Series 28 HiPer-D connectors.

Metal cover for panel-mounted connectors. 500-008 aluminum cover fits M24308 D-Subminiature and Series 28 HiPer-D connectors. Variable height cover completely shrouds connector and seats against panel. Optional EMI panel gasket. Supplied with standard 4 inch (102mm) attachment. Cover has silicone gasket to protect connector face. Cover is supplied with 4-40 male screwlocks to mate with M24308/26 female screwlocks on panel connector. Also available with female screwlocks for use with cable mounted connectors. Aluminum body, passivated SST screwlocks, and silicone gasket.

Protective Cover, Rubber

780-518

This accessory fits D-Subminiature M24308 and Series 28 HiPer-D connectors

Neoprene or silicone. 780-518 rubber cover fits M24308 D-Subminiature and Series 28 HiPer-D connectors. Cover protects connector from damage and contamination. Three material choices: black neoprene, carbon-filled conductive black neoprene, or red silicone. Attach cover with nylon rope. Attachment choices include cable tie, slip knot or stainless steel ring. **Not rated for water immersion.**

Conductive dust caps fit HiPer-D® and M24308-type D-Subminiature connectors. These caps provide electrostatic discharge protection to sensitive equipment. These caps meet the static decay requirement of MIL-PRF-81705E. Surface resistivity is less than 1×10^5 ohms/square. Integral lip allows easy removal. Conductive polyethylene copolymer.

D-Subminiature

557-666

Potting Shell

557-666

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Aluminum potting shell fits M24308-type D-Subminiature connectors. Available in five standard finishes. Fill with potting compound to encapsulate connector terminals and to provide wire strain relief. One piece aluminum shell with passivated stainless steel screwlocks and clips.

687-092, 687-345

Replacement Screwlocks for Type 1 Shrouded Backshells

687-092K KNURLED SLOTTED MALE SCREWLOCK FOR TYPE 1 BACKSHELLS

Replacement male screwlock for Type 1 split shrouded Series 550 backshells. 300 Series stainless steel. Head is cross-drilled for safety wire.

- Order (2) per backshell
- Fits Top Entry and Side Entry backshells

PART NUMBER
687-092K

687-092P FEMALE SCREWLOCK FOR TYPE 1 BACKSHELLS

Replacement female screwlock for Type 1 split shrouded Series 550 backshells. 300 Series stainless steel. Fixed, non-rotating.

- Order (2) per backshell
- Fits Top Entry and Side Entry backshells

PART NUMBER
687-092P

687-345 MALE SCREWLOCK FOR TYPE 1 END ENTRY BACKSHELLS

Replacement male screwlock for End Entry Type 1 split shrouded Series 550 backshells. 300 Series stainless steel. Hex head or knurled slot head. Includes nylon washer and heatshrink tube.

- Order (2) per backshell
- Fits End Entry backshells

D-Subminiature

559-002
EMI Panel Gasket

559-002 EMI PANEL GASKET FOR TYPE 1 SHROUDED BACKSHELLS

Gasket attaches to panel-mounted D-Subminiature connector. Use with shrouded Type 1 backshell. Backshell shroud seats onto gasket for EMI protection. Woven aluminum wire embedded in silicone.

■ For Series 550 Type 1 split backshells

PART NUMBER							
Shell Size	Gasket Part No.	A in	A mm	B in	B mm	C in	C mm
1	559-002-01	.740	18.8	1.500	38.1	.980	24.9

CONE-AND-RING

550-004

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Split, Cone-and-Ring shield termination. 550-004 diecast aluminum backshell fits M24308 D-Subminiature connectors. EMI protected with ground ring for terminating cable shield. Backshell fully shrouds the connector. Eleven shroud lengths. Choose shroud length based on mating connector mounting style. Optional EMI panel gasket installs onto mating connector. When mated, the backshell shroud seats onto the gasket for low-resistance grounding and EMI protection.

550-005

Shrouded Backshell, Braid Trap

- Split EMI Backshell
- Braid Trap Shield Termination
- Saddle Clamp Strain Relief

550-005

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Braid trap shield termination. 550-005 diecast aluminum backshell fits M24308 D-Subminiature connectors. EMI protected. Tapered candelabra thread captivates shield braid. Backshell has groove for heatshrink boot (P/N 770-007). Backshell fully shrouds the connector. Eleven shroud lengths. Choose shroud length based on mating connector mounting style. Optional metalastic EMI panel gasket installs onto mating connector. When fully mated, the backshell shroud seats onto the gasket for low-resistance grounding and EMI protection. Aluminum alloy, stainless steel hardware.

S Side Entry

E End Entry

550-009

This accessory fits D-Subminiature
M24308 connectors.
Not compatible with Series 28 HiPer-D

For rear panel mounted connectors, Cone-and-Ring shield termination. 550-009 diecast aluminum backshell fits rear panel mounted M24308 D-Subminiature connectors. EMI protected. Cable shield attaches to backshell with ground ring. For panel thicknesses up to 3/16 inch (4.8mm). Optional metalastic EMI panel gasket. Connector fits into groove between backshell halves. #4-40 female screwlocks are included. Aluminum with stainless steel screws and washers.

CONE-AND-RING
SHIELD TERMINATION

Fold braid over grounding ring. Tighten
clamp onto backshell to captivate braid.

- Banding Shield Termination
- .24" (6.1mm) Band

550-039

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Band platform, shrouded. 550-039 diecast aluminum backshell fits M24308 D-Subminiature connectors. EMI protected. Cable shield attaches to backshell with optional band strap. Install optional metalastic EMI gasket on mating connector panel. Connector is captivated between backshell halves. Eleven shroud lengths to accommodate mating connector mounting dimensions. #4-40 screwlocks are included. Aluminum with stainless steel screws and washers.

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

TAG Ring® for terminating individual shields, shrouded. 550-041 diecast aluminum backshell fits M24308 D-Subminiature connectors. EMI protected. TAG ring has slots for terminating wire shields. Install optional metalastic EMI gasket on mating connector panel. Available with saddle clamp strain relief or gland nut. Eleven shroud lengths to accommodate mating connector mounting dimensions. #4-40 screwlocks are included. Aluminum with stainless steel hardware.

EMI PANEL GASKET

Install gasket on front side of mating connector panel. Gasket material is .020" thick metalastic (aluminum mesh and silicone). When backshell is fastened to panel connector, the front edge of the shroud seats onto gasket for aperture-free EMI protection.

Shell Size	Gasket Part No.	A		B		C

SHRINK BOOT

Optional heatshrink boot provides cable strain relief. Lipped boot fits .135 (3.4) wide boot groove. Type 1 high-performance semi-rigid elastomer resists fuels and oils and withstands temperature extremes. Operating temperature range -75 to +150 °C.

557-186

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Corrosion-free lightweight composite.
557-186 composite thermoplastic backshell fits M24308 D-Subminiature connectors. EMI protected. Cable shield attaches to backshell with optional band strap. Install optional EMI gasket on mating connector panel. Connector is captivated between backshell halves. Eleven shroud lengths to accommodate mating connector mounting dimensions. #4-40 screwlocks are included. Thermoplastic with stainless steel screws and washers.

557-538

This accessory fits D-Subminiature M24308 connectors.
Not compatible with Series 28 HiPer-D

Lightweight composite, snap-together.
557-538 composite thermoplastic backshell fits M24308 D-Subminiature connectors. Two-piece snap-together backshell offers simple, fast assembly. Banding platform has Qwik-Ty strain relief arm and optional slots for individual wire shields. Backshell fully shrouds the connector. Eleven shroud lengths: Choose shroud length based on mating connector mounting style. Cable shield attaches to backshell with optional band strap. Connector is captivated between backshell halves. #4-40 screwlocks are included. Thermoplastic with stainless steel screws and washers.

EMI, Micro band, lightweight, 60° entry, HiPer-D piggyback. Lightweight, low profile two piece backshell fits HiPer-D® connectors with backshell groove (280-018P, 280-019S, 280-046P, 280-047S). Terminate cable shield with optional .12" width Micro band. Compatible with Glenair Series 77 lipped heat-shrink boots. Non-environmental. Backshell has 60° cable entry angle and large diameter banding porch for large wire bundles. Aluminum with passivated stainless steel screws.

DTL-83513 AND
GLENAIR SIGNATURE
MICRO-D CONNECTORS

**M83513 Micro-D connector
backshells and accessories—
the world's most complete
selection, all with available
same-day delivery**

Special-formula rubber covers for
silent, non-abrasive performance

The MIL-DTL-83513 is the go-to connector for high-performance commercial and military aerospace applications. From satellites to miniaturized avionic equipment, the Micro-D is recognized worldwide for its high-reliability, life-of-system durability, and SWaP. Glenair manufactures and supplies both the connectors as well as the complete range of EMI, environmental, and mechanical strain relief backshells required in the construction of high-reliability wire harnesses and cable assemblies. All our Micro-D connectors and backshells are manufactured in our US and UK facilities and are uniquely supplied with industry-leading availability, up to and including same-day shipment.

**CHECK WIRE BUNDLE SIZE**

The ratio of wire bundle size to backshell entry should not exceed 80%. See 80% Entry Fill Table on next page for recommended sizes for round entry banding backshells when used with Micro-D pre-wired pigtails. In some cases the largest available entry size is too small to meet 80% maximum fill, and an elliptical entry backshell is recommended.

Micro-D Backshell Entry Fill Percentage

ENTRY FILL PERCENTAGE

Entry fill percentage (the ratio of the wire bundle area to the backshell entry area) should not exceed 80% to help assure system performance and safety.

Round entry banding backshells are not large enough to meet this best practice requirement, depending on the number of wires and the wire size. Elliptical backshells should be used instead.

Use the **80% Entry Fill Table** to determine the minimum backshell entry size code for standard Micro-D wire types and sizes.

Use the **Entry Fill Calculator** for custom wire bundles and/or elliptical backshells.

Elliptical banding backshells are recommended if the wire bundle area is greater than 80% of the backshell entry.

80% ENTRY FILL
FOR ROUND ENTRY BACKSHELLS

This table shows recommended entry size codes for standard Micro-D pigtail wiring harnesses used with round entry banding backshells. If no entry size is shown (*), an elliptical backshell is recommended.

No. of Wires	Wire Type	Entry Size Code @80% Max Fill

ENTRY SIZE
FOR ROUND ENTRY BACKSHELLS

ENTRY DIAMETER

MICRO-D BANDING
BACKSHELL WITH ROUND
ENTRY

Entry Size Code	Entry Diameter Min.		Cross-Sectional Area	
	in	mm	sq in	sq mm
04	.110	2.8	.010	6.2
05	.141	3.6	.016	10.1
06	.173	4.4	.024	15.3
07	.204	5.2	.033	21.2
08	.235	6.0	.044	28.1
09	.266	6.8	.056	36.1
10	.297	7.5	.070	45.0
11	.329	8.4	.086	55.2
12	.360	9.1	.102	66.1

ENTRY FILL CALCULATOR

Step	Example
1 Calculate Wire Cross-Sectional Area Wire Cross-Sectional Area = (Wire Diameter) ² * .79 * (No. of Wires) <i>(Repeat for each wire size and add together)</i>	51 wires @ .045 inch diameter .79 * .045 * .045 * 51 = .082 sq. in.
2 Calculate Backshell Cross-Sectional Area Round Entry Cross-Sectional Area = (Entry Diameter) ² * .79 Elliptical Entry Area = .79 * a * b 	Round Entry Size 12, .360 diameter .79 * .360 * .360 = .103 sq. in. Elliptical Entry Size 03 (507-175) .79 * .644 * .290 = .148 sq. in.
3 Entry Fill Ratio = $\frac{\text{1 Wire Cross-Sectional Area}}{\text{2 Backshell Entry Cross-Sectional Area}}$	Round Entry $\frac{.082}{.103} = .80 \text{ or } 80\%$ Elliptical Entry $\frac{.082}{.148} = .55 \text{ or } 55\%$

NOTES

- When round entry banding backshells are used with solder cup Micro-D connectors, the transition angle from the outer pins to the entry port becomes severe and can increase damage susceptibility. Elliptical entry backshells minimize the transition angle and can reduce damage susceptibility.
- For additional protection against wire abrasion, wrap wire bundle with polyimide tape in areas that may come into contact with interior angles.

Micro-D

Band-Master ATS®
Shield Termination Bands and Tools

Band-Master ATS®

Terminate cable braid shield to adapter with stainless steel **Band-Master ATS®** bands. Install band with hand tool or bench-mounted pneumatic tool. Bands are available in *Standard* (.24 inch) and *Micro* (.12 inch) widths. *Slim Standard* and *Micro Slim* bands have reduced thickness for weight reduction. Hardened steel *Micro-Max* bands have 60% more tensile strength than standard Micro bands. Available pre-coiled, bands are 304 series stainless steel, passivated.

For more information on the Band-Master ATS EMI shield termination system, including instruction manuals and calibration details:

Micro-D

500-037

Protective Cover, Rear Panel Mount

500-037

This accessory fits rear-panel mounted MIL-DTL-83513 Class M Micro-D and MWDM connectors

For rear panel mounted connectors. 500-037 protective cover fits M83513 Class M and MWDM Micro-D connectors. Rubber gasket provides dust and moisture protection. Available with lanyard for panel attachment. Aluminum with stainless steel jackscrews, silicone gasket.

Anti-Static Dust Caps

For M83513 and Micro-D Connectors

Anti-static dust caps fit Micro-D and MIL-DTL-83513 connectors. These caps provide electrostatic protection to sensitive equipment. These caps meet the static decay requirement of MIL-PRF-81705. Surface resistivity is greater than 1×10^5 ohms/square and less than 1×10^{12} ohms/square. Black LDPE.

Protective Cover, Rubber

780-555

This accessory fits MIL-DTL-83513 Class M and MWDM Micro-D connectors

Neoprene or silicone. 780-555 rubber cover fits metal shell Micro-D connectors. Cover protects connector from damage and contamination. Three material choices: black neoprene, carbon-filled conductive black neoprene, or red silicone. Nylon rope lanyard attaches cover to cable or panel. Attachment choices include cable tie, slip knot or stainless steel ring. **Not rated for water immersion.**

Mil-Spec Jackscrew Kits

For M83513 and Micro-D Connectors

Stainless steel Micro-D jackscrew kits conform to MIL-DTL-83513/05. Kit consists of (2) jackscrews and (2) retainer rings. Choose slotted head or socket head. Two thread sizes: 2-56 for size 9 to 69, 4-40 for sizes 79, 100 and 130. Place jackscrew through connector mounting hole, then slide e-ring into slot on jackscrew.

Material: 125 kpsi stainless steel, passivated

Application note: retainer ring does not meet the 2 μ magnetic permeability requirement of M83513 connectors.

Micro-D

179-013, 179-162

Jackscrews and Screwlocks, Micro-D

- For Connector without Backshell
- Fits M83513 and MWDM Micro-D
- Includes Retention Clip

1
Fillister Head

2
Socket Head

Stainless steel screwlock and jackscrew kits fit Micro-D connectors without backshells. Screwlocks allow the connectors to be fully mated before the screws are tightened. Jackscrews must be tightened in order to mate connectors. Kit consists of (1) screw and (1) retainer clip, *order (2) kits per connector*. Jackscrew and clip are passivated stainless steel.

ASSEMBLY NOTE

CLIP
CLIP HAS CIRCULAR HOLE AND SQUARE HOLE.

SCREWLOCK
INSTALL CLIP ON CONNECTOR FLANGE WITH SQUARE HOLE. ON TOP. SCREW IS FLOATING.

JACKSCREW
INSTALL CLIP ON CONNECTOR FLANGE WITH SQUARE HOLE. ON THE BOTTOM. SCREW IS CAPTIVE.

Micro-D

Jackpost Kits
For Micro-D Connectors

- Mil Spec and Extended Length
- Fits M83513 and MWDM Micro-D

Stainless steel jackpost kits fit M83513 and MWDM Micro-D connectors. Two thread sizes: 2-56 for size 9 to 69, 4-40 for sizes 79, 100 and 130. Kit consists of (2) female posts, (2) hex nuts and (2) lockwashers. Passivated 300 series stainless steel.

Jackpost Kit, Rear Panel Mount

- Rear Panel Mount
- Fits M83513 and MWDM Micro-D

Rear panel mount jackpost kits fit M83513 and MWDM Micro-D connectors. Two thread sizes: 2-56 for size 9 to 69, 4-40 for sizes 79, 100 and 130. Kit consists of (2) female posts, (2) hex nuts and (2) lockwashers. For panel thicknesses from $\frac{1}{32}$ to $\frac{1}{8}$ inch. Passivated 300 series stainless steel.

Jackpost Kit, Rear Panel Mount PCB

- For MWDM Types BS, BR and CBR
- Rear Panel Mount

Rear panel mount jackpost kit fits MWDM printed circuit board connectors types BS, BR and CBR. Two thread sizes: 2-56 for size 9 to 69, 4-40 for sizes 75, 100 and 130. For panel thicknesses from $\frac{1}{32}$ to $\frac{1}{8}$ inch. Passivated 300 series stainless steel.

Install with threadlocking compound.

Kit consists of (2) female posts.

Replacement Hardware for Micro-D Backshells with .175" Flange

Order (2) per backshell. Replacement screws and retainer clips fit Micro-D backshells with .175 (4.4) flange height. Two thread sizes: 2-56 for size 9 to 69, 4-40 for sizes 75, 100 and 130. Male screws are available in (3) styles: slotted fillister head, hex drive socket head, or extended length slotted. Stainless steel screws, washers, and retainer clips.

EMI Gasket, Panel Mount

- For MWDM and M83513 Class M
- Conductive Fluorosilicone
- Rear Panel Mount

179-135

This accessory fits MWDM and M83513 Class M metal shell Micro-D connectors.

Rear mount, conductive. EMI panel gasket fits standard MWDM metal shell Micro-D connectors and M83513 Class M connectors. Gasket material is Chomerics CHO-Seal 1298 / MIL-DTL-83528 Type D. Install gasket between Micro-D flange and mounting panel for improved electrical bonding and environmental protection.

- Ag/Al filled fluorosilicone
- CHO-Seal 1298
- MIL-DTL-83528 Type D
- +200 °C
- ASTM E595 TML 0.12% CVCM 0.02%

Shorting Cap Backshell

500-016

This accessory fits MWDM and M83513 Class M metal shell Micro-D connectors.

500-016 shorting cap fits M83513 Class M and MWDM Micro-D connectors. Closed backshell is available with lanyard for panel or cable attachment. Aluminum with stainless steel screws and washers.

TABLE 2
ATTACHMENT TYPE

F	 Wire Rope, Nylon Jacket 6/6 nylon over stainless steel rope, fair flexibility, good abrasion resistance, -55 to +100 °C
G	 Black Nylon Rope Very flexible, good abrasion and fuel resistance, .062 (1.6) diameter, -55 to +100 °C
H	 Wire Rope, Clear FEP Jacket Clear FEP jacket over SST rope, fair flexibility, good abrasion resistance, .100" diameter, -65 to +200 °C
S	 Wire Rope, Black Nylon Jacket 6/6 nylon over stainless steel rope, .034 (0.9) diameter, good flexibility, good abrasion resistance, -55 to +100 °C
T	 SST Wire Rope, No Jacket Good flexibility, good abrasion resistance, .047 (1.2) diameter, passivated, -65 to +200 °C

SCREWLOCKS AND JACKSCREWS

CLIP
CLIP HAS CIRCULAR HOLE AND SQUARE HOLE.

SCREWLOCK
SQUARE HOLE IS ON THE TOP. SCREW IS FLOATING. MATE CONNECTORS FIRST, THEN FASTEN SCREWLOCKS.

JACKSCREW
SQUARE HOLE IS ON THE BOTTOM. SCREW IS CAPTIVE. TURN SCREWS TO JACK CONNECTORS TOGETHER.

BAND OPTIONS

Terminate cable braid to backshell with optional band strap and banding tool. Pre-coiled bands are passivated stainless steel. Slim Standard bands have reduced thickness for weight reduction. Micro Slim bands have reduced thickness for weight reduction. Micro-Max bands are high-tension for lower-resistivity termination.

Band Type and Width	Hand Tool	Pneumatic
Standard: .24 (6.1)	601-100	601-106
Slim Standard: .24 (6.1)	601-109	601-110

- Lightweight

507-297

This accessory fits MWDM and M83513 Class M metal shell Micro-D connectors

Lightweight, elliptical entry. 507-297 EMI banding backshell fits metal shell Micro-D connectors. Lightweight design features reduced flange height and reduced hardware weight. Jackscrews have e-rings to attach backshell to connector. Available with jackscrews or female jackposts. Aluminum or stainless steel. Stainless steel screws and e-rings.

BAND OPTIONS

Terminate cable braid to backshell with optional band strap and banding tool. Pre-coiled bands are passivated stainless steel. Micro Slim bands have reduced thickness for weight reduction. Micro-Max bands are high-tension for lower-resistivity termination.

507-145

This accessory fits MWDM and M83513 Class M metal shell Micro-D connectors

EMI, split, banding. 507-145 two piece backshell fits MIL-DTL-83513 Class M and Glenair MWDM Micro-D connectors with metal shell. Micro-D connector is captivated between backshell halves. Terminate cable shield to backshell with Micro band strap. Slide individual wire shields through optional slots on banding platform, or use slots for wire strain relief tie. Four screwlock styles are available: fillister head (standard), socket head, extended length (knurled, slotted), or fixed female hex jackposts. Aluminum with passivated stainless steel screws and washers.

ULTRA-LOW-
PROFILE
CRIMP-CONTACT
RECTANGULAR
SERIES

Series 79 micro miniature
crimp-contact rectangular
with advanced environmental
and EMC performance

Series 79 is an advanced-performance, micro miniature crimp-contact rectangular connector for mission-critical mil-aero applications. The Series 79 is a high-density rectangular equivalent of the Glenair circular Mighty Mouse connector series. It is available with size #23 39029 crimp contacts set on .075" centers, as well as dozens of hybrid contact layouts supporting contact sizes up to #8. Special product line extensions include Series 791 (scoop-proof) and Series 792 (high-speed with common ground plane). Environmentally sealed and shrouded for EMC, the Series 79 meets the need for a higher-performing, precision-machined micro-sized rectangular with industry-standard crimp-and-poke contacts.

Glenair Signature
Series 79 Micro-Crimp Backshells

This precision-machined 799-164 non-environmental piggyback backshell fits Series 792 connectors. Backshell has internal fluorosilicone wire strain relief grommet optimized for axial alignment and support of twinax, quadax or octaxial Ethernet cables.

Band-Master ATS®
Shield Termination Bands and Tools

Band-Master ATS®

Terminate cable braid shield to adapter with stainless steel **Band-Master ATS®** bands. Install band with hand tool or bench-mounted pneumatic tool. Bands are available in *Standard* (.24 inch) and *Micro* (.12 inch) widths. *Slim Standard* and *Micro Slim* bands have reduced thickness for weight reduction. Hardened steel *Micro-Max* bands have 60% more tensile strength than standard Micro bands. Available pre-coiled, bands are 304 series stainless steel, passivated.

For more information on the Band-Master ATS EMI shield termination system, including instruction manuals and calibration details:

Series 79 Micro-Crimp®

799-013

Dust Cap, Anti-Static, Series 790

799-013

This accessory fits Series 790 connectors.

Permanently anti-static. Non-sloughing.
Molded dust caps protect Series 790 connectors from contamination and static discharge.

- Black LDPE Material
- Static Decay per MIL-PRF-81705
- Surface Resistivity: 1E10 to 9.9E11 Ohm/SQ
- Static Decay: <2 sec @ 5kV to 50V, 12% RH

Anti-Static Dust Cap for Series 791
Plug Connector

799-065
Anti-Static Dust Cap for Series 791
Receptacle Connector

Series 79 Micro-Crimp®

799-018 and 799-019

Protective Cover, Series 790

- Fits Series 790 Connectors
- Environmental
- Conductive EMI Gasket

799-018, 799-019

This accessory fits Series 790 Micro-Crimp plug and receptacle connectors

Protective cover has conductive gasket for dust, moisture and EMI protection. Available with lanyard for panel or cable attachment. Aluminum with stainless steel screws and washers. Gasket is Cho-Seal 1287 Ag/Al-filled fluorosilicone.

TABLE 1
ATTACHMENT TYPE

F Wire Rope, Blue Nylon Jacket
6/6 nylon over stainless steel rope, fair flexibility, good abrasion resistance, -55 to +100 °C

G Black Nylon Rope
Very flexible, good abrasion and fuel resistance, .062 (1.6) diameter, -55 to +100 °C

H Wire Rope, Clear FEP Jacket
Clear FEP jacket over SST rope, fair flexibility, good abrasion resistance, .100" diameter, -65 to +200 °C

SK Nylon Rope with Slip Knot
Very flexible, good abrasion and fuel resistance, .094 (2.4) diameter. Length includes .5" (13mm) dia. loop, -55 to +100 °C

T SST Wire Rope, No Jacket
Good flexibility, good abrasion resistance, .047 (1.2) diameter, passivated, -65 to +200 °C

799-131

Piggyback EMI Banding Backshell, Dual Port

- Piggyback Dual Round Entry
- Band-Master® Shield Termination
- Top and Side Entry

799-131

This accessory fits Series 790 and 791 connectors:
790-024, 790-025, 791-001, 791-003

EMI, lightweight, split. 799-131 piggyback backshell fits Series 790 and 791 connectors with rear groove on shell. Dual port banding. Terminate cable shield to backshell with BandMaster ATS band strap. Aluminum with stainless steel screws. Non-environmental.

799-164

Piggyback EMI Banding Backshell, Series 792

- Split Piggyback for Series 792
- Band-Master® Shield Termination
- For High-Speed Data Cables

799-164

This accessory fits Series 792 connectors with twinax, quadrax or El Ochito contacts:
792-001, 792-002

EMI, piggyback, split. 799-164 piggyback backshell fits Series 792 connectors with rear groove on shell. Backshell has internal fluorosilicone wire strain relief grommet. Grommet has three hole sizes to accommodate twinax, quadrax or octaxial high speed cables. Available with Qwik-Ty strain relief arm or slots for lacing tape. Terminate cable shield to backshell with BandMaster ATS band strap. Aluminum with stainless steel screws. Non-environmental.

ARINC 600
STRAIN-RELIEF
AND EMI BANDING
BACKSHELLS

ARINC 600 and M83527
Backshells for Industry-
Standard Modular Rack-and-
Panel Connectors

Glenair makes EMI/RFI filtered connector versions of the ARINC 600 series

ARINC 600 connectors, prevalent in commercial aviation, are modular, high-density interconnects designed for rack-and-panel avionic applications. These connectors feature a modular rectangular design with a highly-ruggedized shell, ensuring life-of-system durability and resistance to shock and vibration. ARINC 600 connectors support standard data bus as well as high-speed data, with insert modules for signal, power, and Ethernet within a single unit. Their modular design allows for easy installation and maintenance, making them a popular choice for avionics systems, communication equipment, and other aerospace applications.

Glenair Signature
ARINC 600 Backshells

527-126

This strain-relief backshell fits ARINC 600 Size 3 connectors.

The 527-126 is a heavy-duty strain relief device designed to protect the large volume of wire terminations servicing a typical ARINC 600 size 3 connector.

Band-Master ATS®
Shield Termination Bands and Tools

Band-Master ATS®

Terminate cable braid shield to adapter with stainless steel **Band-Master ATS®** bands. Install band with hand tool or bench-mounted pneumatic tool. Bands are available in *Standard* (.24 inch) and *Micro* (.12 inch) widths. *Slim Standard* and *Micro Slim* bands have reduced thickness for weight reduction. Hardened steel *Micro-Max* bands have 60% more tensile strength than standard Micro bands. Available pre-coiled, bands are 304 series stainless steel, passivated.

For more information on the Band-Master ATS EMI shield termination system, including instruction manuals and calibration details:

527-257

ARINC 600 Size 1 Backshell, Strain Relief

- Self-Locking Saddle Clamp
- EMI Braidsock Option

527-257

This strain-relief backshell fits ARINC 600 Size 1 connectors.

Two clamp types: saddle clamp for unshielded wire bundles or saddle clamp with nickel-plated copper braid sock for shielding applications. Backshell ports feature Adapter Code H (D38999 Series III/IV) interface. Composite clamps are flight-grade self-locking style with full-radius saddles.

EPXB TYPE
AVIATION
INDUSTRY MODULAR
CONNECTOR SERIES

Modular EPXB, BACC65,
EN4165, and SIM EMI/RFI
and Strain Relief Backshells

EPXB type modular connectors are widely employed in aviation for their versatility and reliability. EPXB type connectors offer a modular construction, enabling easy customization and flexibility in configuring complex avionics systems. These connectors feature a ruggedized design, capable of withstanding harsh environmental conditions such as extreme temperatures, vibrations, and electromagnetic interference commonly encountered in aircraft operations. EPXB type connectors support high-speed data transmission, power distribution, and signal connections, making them integral components in avionic systems, communication equipment, and IFE systems.

Glenair Signature
Modular Rectangular Backshells

527-410

*This EMI banding backshell fits
BACC65AA/AB and EPXB2 connectors*

The 527-410 is a split-shell EMI banding backshell with a low-profile 1" (25.4) can height. Elliptical cable entries accommodate large wire bundles. Cable shields attach with Standard or Slim Standard Band-Master ATS® band straps.

DPX / AS81659
BACKSHELLS
FOR ARINC 404
RACK-AND-PANEL
CONNECTORS

Complete DPX / AS81659 backshell capability: solid, split-shell, environmental, non-environmental, EMI/RFI, strain relief and more.

AS 81659 split-shell EMI backshell with Qwik-Ty strain relief

Line Replaceable Units (LRUs) are incorporated into avionic racks in commercial and military aircraft. Installation and maintenance of avionic equipment is facilitated through the use of rack-and-panel connectors which mate and demate without the use of mechanical coupling. On the cable side, these rack-and-panel connectors are equipped with backshell accessories to address common environmental, electrical, and mechanical stress problems which can damage cables and cable-to-connector terminations. Glenair supplies the complete range of DPX / AS81659 (ARINC 404) connector accessories and backshells for cable strain relief, environmental sealing, and EMI/RFI shield termination.

Backshell, EMI, AS81659, M25 Thread

507-117

EMI backshell with M25 thread fits
AS81659 connectors

Backshell has M25 thread and interface teeth compatible with Adapter Code H (D38999 Series III/IV) size 17 fittings.

Aluminum with stainless steel hardware.

527-070

Backshell, EMI TAG Ring, DPX2

527-070

EMI TAG Ring® backshell fits DPX2 connectors

Fits ITT Cannon DPX2 connectors. Backshell has slotted ring, gold-plated ground spring and Teflon friction washer for terminating individual wire shields. Two strain relief options: saddle clamp or nut (*nut requires shrink boot for cable strain relief*).

Aluminum with stainless steel hardware. Gold-plated beryllium copper ground spring, Teflon friction washer.

TAG® RING

SHRINK BOOT

Optional lipped heatshrink boot fits .135 (3.4) wide boot groove. Type 1 high-performance semi-rigid elastomer resists fuels and oils and withstands temperature extremes. Operating temperature range -75 to +150 °C.

M83733/DPK TYPE
BACKSHELLS,
STRAIN RELIEFS
AND ACCESSORIES

Cable strain relief and
EMI/RFI shield termination
backshells for M83733 / DPK
connectors

MIL-C-83733 connectors are utilized in military aircraft applications and are subject to severe electrical, environmental, and mechanical stress. The cable side of these rack-and-panel connectors must be equipped with strain relief or cable shield termination backshells in accordance with DLA specifications. Glenair's split-shell backshells for MIL-C-83733 connectors are available in three designs which offer either a standard cable clamp, saddle-bar style strain-relief, or an EMI shield banding platform. Tongue-and-groove joints in the split-shell designs provide optimal electromagnetic compatibility. Backshells may be ordered with up to six cable entry locations for complete flexibility in wire and cable routing.

**Glenair Signature Series
M83733 Backshells**
