mikroPascal PRO for dsPIC/PIC24 is a full-featured Pascal compiler for Microchip® dsPIC and PIC24 devices. Pascal is a popular programming language that encapsulates strong data types, very nice syntax, and has probably the best balance between simplicity and control. It has intuitive IDE with docking support, rich with features, advanced text editor, many available tools, libraries and examples. Compiler uses advanced SSA optimization algorithms that reduce your generated code by an average of 20%. It is definitely an affordable solution and an excellent choice.

Free upgrades

Compiler is constantly improved and new functionalities are added with each new release. Owners of compiler licenses are entitled to free upgrades, which take just a minute of your time.

Free support

mikroPascal PRO for dsPIC/24 license guarantees you free product lifetime technical support, so you can rely on our help when developing your prototype.

Best price/performance

With mikroPascal PRO for dsPIC/PIC24 you get full-featured and powerful tool, and in the same time very intuitive and easy-to-use. No dsPIC/24 compilers offers so much at such a price.

Activation code

USB Dongle is a portable license that can be used on different computers. [Click here](#) for detailed usage instructions.
