DESCRIPTION

From Ötzi the Iceman to Gucci Mane's ice cone face tat, tattooing has been a cultural practice for thousands of years. Whether it's in commemoration or self expression, skin art can be a big decision! Here at Adafruit we're definitely not afraid of permanence, but needles can be pretty scary!

Which is why we love this **Blinka the CircuitPython Temporary Tattoo** - this safe, non-permanent, easily removable tattoo is vibrant, nicely sized, and looks great on everybody. We slapped one on, and we're pleased to report the tattoo lasted a week while looking good.

Application Tips:

- Make sure your skin is nice and clean, free of oil and makeup
- Remove the clear protective top sheet.
- Press tattoo firmly on dry skin with design facing down.
- Hold a wet cloth against the back of the tattoo. Press down and make sure to wet thoroughly.
- Wait 30 seconds. Revel in the excitement of having the cutest, friendliest CircuitPython on your arm, leg, whatever. Remove the paper backing.
- Gently rinse image with water for best effect.
