#### General Note

DI TECHNO

BI Technologies IRC Welwyn

#### **CAR** series

#### Construction

Ceramic rods are coated with a metal film and plated steel caps are force fitted. A helical cut is used to adjust the film to its final value.

Termination wires are welded to the caps and the resistor is protected with a specially formulated epoxy coating.

#### **Terminations**

**Material** Solderable finish copper wire.

**Strength** The terminations meet the requirements of

IEC 68.2.21

**Solderability** The terminations meet the requirements of

IEC 115-1, Clause 4.17.3.2

#### Marking

Type reference, TCR code, resistance value and tolerance code

The resistance value marking conforms to IEC 62.

#### **Solvent Resistance**

The body protection and marking are resistant to all normal industrial cleaning fluids suitable for printed circuits.
