

DESCRIPTION:

High current density due to double mesa technology; SIPOS and Glass Passivation.

BTB16/BTB16 series triacs is suitable for general purpose AC switching. They can be used as an ON/OFF Function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation light dimmers, motorspeed controllers.

BTB16/BTB16- $\times\times\times$ SW、 $\times\times\times$ CW、 $\times\times\times$ BW are 3 Quadrants triacs, They are specially recommended for use on inductive loads.

TO-220ABins and TO-220F are isolated internally, they provides a 2500V RMS isolation voltage from all three terminals to external heatsink.
